RE: Request for Technical Memorandum- #NV0023060

Dear Mr. Clough:

NDEP requests that a technical report be prepared to discuss and summarize improvement options which could be implemented to achieve a 1 lb/day or less discharge of Total Ammonia and 1 lb/day or less of Total Phosphorous to the receiving body. The Las Vegas Wash has a Total Maximum Daily Load for these constituents. The implementation of the best available controls and treatment technologies is required to meet the water quality standards.

If you should have any questions, please call me (775) 687-9414.

Sincerely,

Nicholas Brothers, P.E.
Permits Branch Supervisor
Bureau of Water Pollution Control
