

RECORD OF COMMUNICATION		Phone
To: Keith Bailey, Susan Crowley: Tronox	From: Brian Rakvica, Shannon Harbour: NDEP	Date: 05/07/07
Subject: Phase A Work Plan Addendum: Low Low Flow Sampling		
<p>Summary: NDEP returned voice mail from Keith Bailey in response to NDEP's May 1, 2007 email. TRX wants to compare analytical results from samples collected using a very low flow rate (~ 100 ml/min) and flow rate used during original Phase A sampling (both filtered and unfiltered samples). NDEP does not have any issues with TRX conducting this work but was concerned that sampling will not give conclusive results.</p>		
<p>Action Taken/Required:</p> <p>Keith will send email containing zip file with Phase A validated data. (DVSRs will be coming soon.</p> <p>Brian followed-up call with email explaining NDEP's concerns for the addendum work.</p>
