

RECORD OF COMMUNICATION	DISCUSSION FIELD TRIP CONFERENCE PHONE CALL X OTHER (SPECIFY)	
	(Record of item checked above)	
TO: various BWPC	FROM: Brian Rakvica	DATE:11/6/03 TIME:4:30 PM
SUBJECT: KMCC permit modification		
<p>SUMMARY OF COMMUNICATION:</p> <ol style="list-style-type: none"> 1. Tamara Pelham called to let BAR know that she had been assigned to the KMCC and TIMET projects as a permit specialist. Tamara noted that she had written the permit for the Pioneer-Stauffer-Montrose project. 2. Tamara had a few questions and were reviewed as noted below. 3. BAR and Tamara reviewed the issue of gross alpha and the fact that the radionuclide rule was promulgated after the last permit was issued. Brian noted to Tamara that Jeff Johnson is also a good resource for reviewing technical questions such as gross alpha. 4. BAR and Tamara discussed other analytes that may potentially be an issue at the KMCC site. 5. BAR asked if it would be possible to require a broad suite analysis in KMCC's NPDES discharge and in the monitoring wells. Tamara indicated that it would. 6. BAR reviewed the proposed KMCC construction schedule with Tamara. This will be tight to complete a "major modification". 7. BAR noted to Tamara that she should also discuss this project with Todd Croft and Jon Palm. 8. Todd had concerns that this change was being considered a major modification as Todd was under the impression that this would be handled differently. 9. Alan Tinney called Bar on 11/7/03 at 9:00 Am to follow up on an email that BAR had sent. 10. Alan felt that this would likely be a major modification due to the fact that there is a significant flow change. Alan to review with Jon Palm and Tamara. 11. BAR and Alan also discussed the analyte issue and the construction schedule issue. At worst case, BAR and Alan will review on the 20th. 12. Alan noted that he and Tamara are trying to work with EPA to build some flexibility into this permit.
