DUST CONTROL MEASURES MUST OCCUR 24 HOURS A DAY, 7 DAYS A WEEK

THIS PERMIT IS NOT VALID UNTIL ALL FEES ARE PAID IN FULL AND A COMPLETE COPY IS ON THE PROJECT SITE, INCLUDING CONDITIONS OF PERMIT AND DUST MITIGATION PLAN

It is a condition of the issuance of any operating permit required by the commission or pursuant to any local ordinance for the control of air pollution that the holder of the operating permit agrees to permit inspection of the premises to which the permit relates by any authorized officer of the department at any time during the holder's hours of operation without prior notice. This condition must be stated on each application form and operating permit. NRS 445B.580.

The issuance of this PERMIT does not relieve the PERMITTEE from compliance with all other applicable federal, state, county and local ordinances and regulations. Issuance of this PERMIT shall not be a defense to violations of any applicable ordinances or regulations.

**APPLICATION
DUST CONTROL PERMIT FOR CONSTRUCTION ACTIVITIES**

Blank spaces must be completed for the application to be processed. If not applicable, enter N/A.

1. Applicant/Permittee:

Property Owner Developer Prime Contractor Other _____

Name: Las Vegas Paving Cop.

Address: 4420 s.Decatur Blvd.

City: Las Vegas State: NV Zip: 89103

Telephone: 251-5800 Ext: _____ Fax: 257-9436

E-mail Address: thildreth@lasvegaspaving.com

2. Project:

Name: Abatement
Asbestos Aatement

Address: 560 W. Lake Mead Pkwy City: Henderson

Nearest major cross-streets: US-95

Township(s): 22 Range(s): 62 Section(s): 13

Assessor's Parcel number(s) (Attach map): ~~17813101004~~ 178 13 101 002, 17812 201 004

Project Description: Asbestos remediation

Project Acreage: 6.6 acres (rounded to the nearest 0.1 acre, all land that will be disturbed must be included in project acreage)

Submit non-refundable minimum fee for 1 acre with application (applied to total permit fee collected upon permit approval). Permit fees are based on project acreage, rounded up to the next whole acre.

You must select one of the following three choices.

- This project does not require any offsite street or utility development.
- This project requires offsite street/utility development that is not included in this application, and will be added at a later date by modification or additional permit.
- This application includes offsite street/utility development. (Area must be marked on the accompanying parcel map. Check all that apply)
 - Utility Lateral less than 100 ft. greater than 100 ft. Half Street Full Street
 - Curb / Entrance Entity Name and Number of Approved Offsite Plan / Permit / Easement: _____
 - Plan Pending Other

3. Property Owner (if not applicant):

Name: Tronox, LLC.

If applicant is NOT the Property Owner, applicant must complete the Owner's Designee form DCP 05, see Attachment 1: Dust Control Permit Forms. The signature on the Owner's designee form must be the same person that signs this application.

4. Point of Contact for dust control matters and to whom a NOTICE OF VIOLATION should be sent if necessary:

Name: Troy Hildreth Company: Las Vegas Paing Corp.
Address: 4420 S. Decatur
City: Las Vegas State: NV Zip: 89103
Telephone: 251-5800 Ext: Fax: 257-9436
Cellular/Pager: 510-1278 After Hours Phone: 510-1278

5. On-site Superintendent/Supervisor/Foreman contact:

Name: Troy Hildreth Company: Las Vegas Paving Corp.
On-site phone: 510-1278 Cellular/Pager: 510-1278
DAQEM Dust Class Certification/Card #: dm0205007 Expiration date: 3/27/11

Have all other on-site supervisory personnel attended the DAQEM Dust Class? Yes No
If no, all on-site supervisory personnel must attend a DAQEM Dust Class within 30 days.

6. Storm Water Advisory: Be advised that all land disturbances that exceed one (1) acre or which are adjacent to a waterway must submit a "Notice of Intent" to the Nevada Division of Environmental Protection (NDEP) that certifies a Storm Water Pollution Prevention Plan has been developed and is maintained for the site. For information contact NDEP at (775) 687-9429. Applications and instructions are available at www.ndep.nv.gov/bwpc/storm01.htm

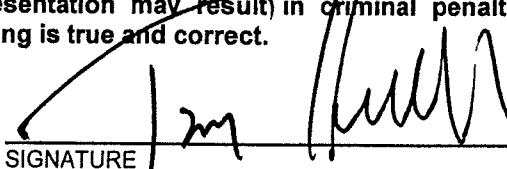

7. By signing this permit application I certify that:

- A. I am authorized, on behalf of the individual or company listed in Section 1, as Applicant/Permittee, to apply for their Dust Control Permit and to commit to all of the terms and conditions of the requested permit.
- B. Construction activities will be limited to lands that the applicant/permittee either owns or is authorized to use for construction activities. The permit issued subsequent to this application is not a substitute for obtaining the property owners permission to use his land. Issuance of a Dust Control Permit is intended only for the purpose of controlling emissions of air pollutants and assuring compliance with Air Quality Regulations. The applicant/permittee agrees to hold harmless, indemnify, and defend Clark County, its employees and assigns from any claims that may arise due to any unauthorized use of land for construction activities.
- C. The permittee accepts responsibility for assuring that all contractors, subcontractors, and all other persons on the construction site covered by this permit, comply with the terms and conditions of the permit, the dust mitigation plan and all applicable Air Quality Regulations.
- D. The applicant/permittee understands that it is a condition of the permit that the permittee agrees to allow the inspection of the site for compliance with the terms and conditions of the permit and Air Quality Regulations at any time during the permittee's hours of operation by a DAQEM officer without prior notice or at any time pursuant to the investigation of a complaint or upon direct observation of emission and/or failure to maintain Best Management Practices.
- E. I understand that any material misrepresentation made in this application may invalidate the permit and that Clark County may pursue enforcement action against me. In addition, I understand any willful misrepresentation may result in criminal penalties. I declare under penalty of perjury that the foregoing is true and correct.

DUST MITIGATION PLAN FOR ALL PROJECTS

Project Name: Asbestos Aatement

Permittee Name: Las Vegas Paving Cop.

Identify the Project Soil "Particulate Emission Potential" (check all that apply):

Using silt and optimum moisture content to determine the particulate emission potential (PEP) is the preferred method.

- PEP determined using generalized PEP determination maps included in the Dust Control Handbook.
- PEP determined using silt vs. optimum moisture table in Figure 2 of the Dust Control Handbook.

Percentage of silt through a #200 sieve: ____% Optimum moisture content: ____%

PEP for this project is determined to be:

- High
- Moderate High
- Moderate Low
- Low

- Water source: Hydrant with Jones Valve Fire hose Water trucks/pulls Well
- Stand tanks Ponds Other: _____

PROJECT ACTIVITIES CHECKLIST

Instructions:

Place a check mark in the box to the right of each Project Activity that will occur on your project. If additional soil disturbing activities that are not on the checklist are to be included in the project, list them on a separate page and provide a description. For a more complete description of the listed activities, see the Control Measures Selection Pages (Form DCP03) that follow or refer to the Best Management Practices for dust control in the Dust Control Handbook.

BMP 10 Disturbed Soil and BMP 20 Trackout Prevention and Cleanup must be marked for every Dust Mitigation Plan.

CONTROL MEASURES SELECTION PAGES

Instructions:

For each project activity that you have selected on the Project Activities Checklist you must include the corresponding Control Measures Selection Page. Read and understand each item listed as a "Requirement" on these included pages. Where control measure options are listed, place a check in the box in front of the control measure you will use to meet that requirement. You must select at least one control measure where a choice is listed. In addition you must select the control measure that corresponds to your PEP as listed above, if applicable.

NOTE: PROJECTS 10 ACRES AND LARGER MUST COMPLETE A SUPPLEMENT TO THE DUST MITIGATION PLAN (APPENDIX B-1 AND B-2).

PROJECT ACTIVITIES CHECKLIST

Project Name: Asbestos Aatement

Permittee Name: Las Vegas Paving Cop.

PLACE A CHECK MARK NEXT TO EVERY ACTIVITY THAT WILL BE CONDUCTED ON THIS SITE, FOR EACH CHECKED ACTIVITY COMPLETE THE CORRESPONDING CONTROL MEASURES SELECTION PAGE AND INCLUDE WITH APPLICATION.

BMP	Project Activity	Check All That Apply
01	Backfilling Filling area previously excavated or trenched.	<input checked="" type="checkbox"/>
02	Blasting - Abrasive Sandblasting and/or abrasive blasting.	<input type="checkbox"/>
03	Blasting Soil & Rock Explosive blasting of soil and rock.	<input type="checkbox"/>
04	Clearing & Grubbing Clearing and grubbing for site preparation and vacant land cleanup.	<input type="checkbox"/>
05	Clearing Forms, Foundations and Slabs Clearing and cleaning of forms, foundations and slabs prior to pouring concrete.	<input type="checkbox"/>
06	Crushing Crushing of construction and demolition debris, rock and soil.	<input type="checkbox"/>
07	Cut and/or Fill Cut and/or fill soils for site grade preparation.	<input type="checkbox"/>
08	Demolition - Implosion Implosive demolition of a structure, using explosives.	<input type="checkbox"/>
09	Demolition - Mechanical/Manual Mechanical and manual demolition of walls, stucco, concrete, freestanding structures, buildings, load-bearing walls and/or removal of transit pipe	<input type="checkbox"/>
10	Disturbed Soil THIS ACTIVITY MUST BE SELECTED FOR ALL PROJECTS Disturbed soil throughout project including between structures.	<input checked="" type="checkbox"/>
11	Disturbed Land - Long Term Stabilization Large tracts of disturbed land that will not have continuing activity for more than 30 days.	<input checked="" type="checkbox"/>
12	Dust Suppressants - Selection and Use Selection and use of chemical and organic dust suppressing agents and other dust palliatives.	<input type="checkbox"/>
13	Importing/Exporting Materials Importing or exporting of soil, aggregate, decorative rock, debris, Type II and other bulk material.	<input checked="" type="checkbox"/>
14	Landscaping Installation of sod, decorative rock, desert or other landscape material.	<input type="checkbox"/>
15	Paving/Subgrade Preparation Subgrade preparation for paving streets, parking lots, etc.	<input type="checkbox"/>
16	Sawing/Cutting Material Sawing or cutting materials such as concrete, asphalt, block or pipe.	<input type="checkbox"/>
17	Screening Screening of rock, soil or construction debris.	<input type="checkbox"/>
18	Staging Areas Staging areas, equipment storage, vehicle parking lots, and material storage areas.	<input type="checkbox"/>
19	Stockpiles Stockpiling of materials, such as Type II, other soils, rock or debris, for future use or export.	<input checked="" type="checkbox"/>
20	Trackout Prevention and Cleanup THIS ACTIVITY MUST BE SELECTED FOR ALL PROJECTS Prevention and cleanup of mud, silt and soil tracked out onto paved roads.	<input checked="" type="checkbox"/>
21	Traffic - Unpaved Routes and Parking Construction related traffic on unpaved interior and/or access roads and unpaved employee/worker parking areas.	<input type="checkbox"/>
22	Trenching Trenching with track or wheel mounted excavator, shovel, backhoe or trencher.	<input checked="" type="checkbox"/>
23	Truck Loading Loading trucks with materials including construction and demolition debris, rock and soil.	<input checked="" type="checkbox"/>

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

BACKFILLING

BMP 01

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Stabilize backfill material when not actively handling.

- 01-1 Water backfill material to maintain moisture or to form crust when not actively handling.
- 01-2 Apply and maintain a dust palliative to backfill material to form crust when not actively handling.
- 01-3 Cover or enclose backfill material when not actively handling.

Requirement: Stabilize backfill material during handling.

- 01-4 Empty loader bucket slowly and minimize drop height from loader bucket.
- 01-5 Dedicate water truck or large hose to backfilling equipment and apply water as needed.

Note: Select at least one of the above; in addition the appropriate control measure for your soil type must be selected from the following.

- 01-6 **L:** Mix moist soil with dry soil until the optimum moisture is reached.
- 01-7 **ML:** Apply and mix water into the backfill material until optimum moisture is reached.
- 01-8 **MH:** Apply and mix water and tackifier solution into the backfill material until optimum moisture is reached.
- 01-9 **H:** Apply and mix water and surfactant solution into the backfill material until optimum moisture is reached.

Requirement: Stabilize soil at completion of backfilling activity.

- 01-10 Apply water and maintain disturbed soils in a stable condition until permanent stabilization is complete.
- 01-11 Apply and maintain a dust palliative on disturbed soils to form a crust following backfilling activity.

Requirement: Stabilize material while using pipe padder equipment.

- 01-12 Mix moist soil with dry soil until the optimum moisture is reached.
- 01-13 Dedicate water truck or large hose to equipment and apply water as needed.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

DISTURBED SOIL

BMP 10

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: For each non-linear project to be permitted for 5 acres or less; install perimeter wind barrier 3 feet or more in height made of material with a porosity of 50% or less.

Requirement: Limit vehicle traffic and disturbance of soils where possible.

- 10-1 Limit vehicle traffic and disturbance of soils with the use of fencing, barriers, barricades, and/or wind barriers.

Requirement: Stabilize and maintain stability of all disturbed soil throughout construction site.

Note: You must choose one or more of the following.

- 10-2 Apply water to stabilize disturbed soils. Soils must be kept in a sufficiently damp, crusted or covered condition.
- 10-3 Apply and maintain a dust palliative based on soil type and future plans.

Requirement: Soil conditions, including preventive and corrective measures, must be recorded every day the construction project is active.

- 10-4 Record soil conditions and dust control actions in daily project records.

Recommendations: If interior block walls are planned, install as early in the construction as possible.

See also: BMP 11: DISTURBED LAND – Long-Term Stabilization, if no continuing activity will occur within 30 days.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

DISTURBED LAND – Long-Term Stabilization

BMP 11

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

**Requirement: Stabilize soil to meet standards required by Air Quality
Regulation Section 90.**

- 11-1 Apply and maintain a dust palliative on disturbed soils for long-term stabilization.
- 11-2 Stabilize disturbed soil with vegetation for long-term stabilization.
- 11-3 Pave or apply surface rock for long-term stabilization.
- 11-4 Use wind breaks in accordance with a site-specific plan approved by the Control Officer and Region IX Administrator of the EPA.
- 11-5 Apply water and maintain soils in a visible damp or crusted condition for temporary stabilization.

Requirement: Prevent access to limit soil disturbance.

- 11-6 Prevent access by fencing, ditches, vegetation, berms or other suitable barrier or means approved by the Control Officer.

Recommendations: Plant perimeter vegetation early. Use of native and drought-tolerant plants with greater than 50 % silhouette area is encouraged.

See also: BMP 12: DUST SUPPRESSANT, DUST PALLIATIVE AND SURFACTANT – Selection and Use.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

IMPORTING/EXPORTING SOIL, ROCK AND OTHER BULK MATERIAL

BMP 13

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Limit visible dust opacity from vehicular operations.

- 13-1 Apply water and limit vehicle speeds to 15 mph on the work site.
- 13-2 Apply and maintain dust suppressant on haul routes.

Requirement: Check belly-dump truck seals regularly and remove any trapped rocks to prevent spillage.

Requirement: Maintain 3-6 inches of freeboard to minimize spillage.

Requirement: Stabilize materials during transport on site.

- 13-3 Use tarps or other suitable enclosures on haul trucks.
- 13-4 Stabilize materials with water.

Requirement: Clean wheels and undercarriage of haul trucks prior to leaving construction site.

Recommendations: Verify State and local laws, concerning the hauling of bulk materials on public roadways.

See also: BMP 20: TRACKOUT PREVENTION AND CLEANUP.

BMP 23: TRUCK LOADING.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

STOCKPILING

BMP 19

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: To the extent possible, maintain stockpile to avoid steep sides or faces.

Requirement: Stockpile location and height must be maintained pursuant to Air Quality Regulations. Stockpiles located within 100 yards of occupied buildings must not be constructed over 8 feet in height.

- 19-1 Stockpiles will not be constructed over 8 feet in height.
- 19-2 Stockpiles will be constructed over 8 feet high and must have a road bladed to the top to allow water truck access or must have a sprinkler irrigation system installed, used and maintained

Requirement: Stabilize surface soils where support equipment and vehicles will operate.

- 19-3 Pre-water and maintain surface soils in a stabilized condition where support equipment and vehicles will operate.
- 19-4 Apply and maintain a dust palliative on surface soils where support equipment and vehicles will operate.

Requirement: Stabilize stockpile materials during handling.

- 19-5 Maintain stockpile materials with at least 70% optimum moisture content.
- 19-6 Remove material from the downwind side of the stockpile, when safe to do so.

Note: Select at least one of the above; in addition the appropriate control measure for your soil type must be selected from the following.

- 19-7 **L & ML:** Apply water during stacking, loading and unloading operations.
- 19-8 **MH:** Apply a water and tackifier mixture during stacking, loading and unloading operations.
- 19-9 **H:** Apply a water and surfactant mixture during stacking, loading and unloading operations.

(Continued on next page)

CONTROL MEASURES SELECTION PAGES

Requirement: Stabilize stockpiles at completion of activity.

- 19-10 Water stockpiles to form a crust immediately at the completion of activity.
- 19-11 Apply and maintain a dust palliative to all outer surfaces of the stockpiles.
- 19-12 Provide and maintain wind barriers on 3 sides of the pile, whose length is no less than equal to the length of the pile, whose distance from the pile is no more than twice the height of the pile, whose height is equal to the pile height, and made of material with a porosity of 50% or less.
- 19-13 Apply a cover or screen to stockpiles.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

TRACKOUT PREVENTION AND CLEANUP

BMP 20

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: In soils that have a PEP classification of "High", pave construction activities roadways as early as possible.

Requirement: Use of soil to create a ramp for vehicle access over a curb is prohibited.

Requirement: Trackout conditions, including preventive and corrective measures, must be recorded daily for every day that the construction project access is used by vehicles.

- 20-1 Record soil conditions and dust control actions in daily project records.

Requirement: Prevent dust from trackout.

- 20-2 Immediately clean trackout from paved surfaces to maintain dust control. Trackout must not extend 50 feet or more.
- 20-3 Maintain dust control during working hours and clean trackout from paved surfaces at the end of the work shift/day. Trackout must not extend 50 feet or more and must be cleaned daily, at minimum.

Requirement: Install and maintain trackout control devices in effective condition at all access points where paved and unpaved access or travel routes intersect.

- 20-4 Install gravel pad(s) consisting of 1" to 3" rough diameter, clean, well-graded gravel or crushed rock. Minimum dimensions must be 30 feet wide by 3 inches deep, and, at minimum, 50' or the length of the longest haul truck, whichever is greater. Re-screen, wash or apply additional rock in gravel pad to maintain effectiveness.
- 20-5 Install wheel shakers. Clean wheel shakers on a regular basis to maintain effectiveness.
- 20-6 Install wheel washers. Maintain wheel washers on a regular basis to maintain effectiveness.
- 20-7 Install wheel shakers in the event that trackout cannot be controlled with gravel pads.
- 20-8 Install wheel washer in the event that trackout cannot be controlled with gravel pads and wheel shakers.
- 20-9 Motorized vehicles will only operate on paved surfaces.

(Continued on next page)

CONTROL MEASURES SELECTION PAGES

Requirement: All exiting traffic must be routed over selected trackout control device(s).

- 20-10 Clearly establish and enforce traffic patterns to route traffic over selected trackout control device(s).
- 20-11 Limit site accessibility to routes with trackout control devices in place by installing effective barriers on unprotected routes.

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

TRENCHING

BMP 22

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Stabilize surface soils where trenching equipment, support equipment and vehicles will operate.

- 22-1 Pre-water and maintain surface soils in a stabilized condition where trenching equipment, support equipment and vehicles will operate.
- 22-2 Apply and maintain a dust palliative to surface soils where trenching equipment, support equipment and vehicles will operate.

Requirement: Presoak soils prior to trenching activities.

- 22-3 Pre-water surface, pre-trench to 18" depth, soak soils via pre-trench prior to deep trenching.
- 22-4 **L & ML:** Presoak soil with water using sprinklers or wobblers.
- 22-5 **L & ML:** Presoak with water, using water truck and/or water pull.
- 22-6 **MH:** Presoak soil with a water and tackifier mixture using water pulls and/or water trucks.
- 22-7 **MH:** Presoak soil with a water and tackifier mixture using sprinklers or wobblers.
- 22-8 **H:** Presoak soil with a water and surfactant mixture using water pulls and/or water trucks.
- 22-9 **H:** Presoak soil with a water and surfactant mixture using sprinklers or wobblers.

Requirement: Stabilize soil during trenching activities.

- 22-10 **L & ML:** Complete trenching with a dedicated water truck or large hose maintaining water as needed to prevent dust.
- 22-11 **L & ML:** Use spray nozzles mounted on trenching machine.
- 22-12 **MH:** Complete trenching with a dedicated water truck or large hose maintaining a water and tackifier mixture as needed to prevent dust.
- 22-13 **H:** Complete trenching with a dedicated water truck or large hose maintaining a water and surfactant mixture as needed to prevent dust.

(Continued on next page)

CONTROL MEASURES SELECTION PAGES

Asbestos Aatement

TRUCK LOADING

BMP 23

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Ensure all loads are covered prior to leaving the construction site and traveling on public roadways.

Requirement: Stabilize surface soils where loaders, support equipment and vehicles will operate.

- 23-1 Pre-water and maintain surface soils in a stabilized condition where loaders, support equipment and vehicles will operate.
- 23-2 Apply and maintain a dust palliative on surface soils where loaders, support equipment and vehicles will operate.

Requirement: Stabilize material during loading.

- 23-3 Empty loader bucket slowly and keep loader bucket close to the truck to minimize the drop height while dumping.

Note: You must selected 23-3 if PEP is greater than LOW, in addition one of the following must be selected.

- 23-4 **L & ML:** Mix material with water prior to loading.
- 23-5 **L & ML:** Spray material with water while loading.
- 23-6 **MH:** Mix material with a water and tackifier mixture prior to loading.
- 23-7 **MH:** Spray material with a water and tackifier mixture while loading.
- 23-8 **H:** Mix material with a water and surfactant mixture prior to loading.
- 23-9 **H:** Spray material with a water and surfactant mixture while loading.

**CONSTRUCTION ACTIVITIES DUST CONTROL PERMIT
SUPPLEMENTAL PERMITS/APPROVALS CHECKLIST**

The following construction activities require permits or approval in addition to a Dust Control Permit. Permits or approvals must be obtained prior to conducting the activity. This form must be submitted with every Dust Mitigation Plan. *Check all activities that apply to the construction project.*

Activities requiring a Various Locations Permit (VLP):

(Comply with VLP regulations prior to installation of this equipment on the project site.)

- | | |
|---|--|
| <p>Operation of a:</p> <ul style="list-style-type: none"> <input type="checkbox"/> powered crusher at temporary locations. <input type="checkbox"/> powered screen at temporary locations. <input type="checkbox"/> concrete batch plant at temporary locations. <input type="checkbox"/> asphalt batch plant at temporary locations. | <p><u>List Name of VLP Company and/or VLP#</u></p> <p>_____</p> <p>_____</p> <p>_____</p> <p>_____</p> |
|---|--|

Activities requiring Supplemental Permit:

(Submit applicable supplemental forms. Asbestos survey is required for any size demo/remodel. NESHAP notification is required for ANY size demolition or for remodel if RACM is found.)

- Blasting to fracture rock, hardpan, or caliche.
- Blasting to implode a structure.
- Demolition of a structure greater than 1,000 square feet.
 - Structural remodeling
 - Structure relocation

Activities requiring Authority to Construct (ATC) Certificate and Operating Permit:

(An ATC must be obtained prior to installation of this equipment/facility.)

- Construction of or installation of any Emission Unit

<input type="checkbox"/> Gasoline Dispensing Facility	<input type="checkbox"/> Plating Shop
<input type="checkbox"/> Cooling Tower	<input type="checkbox"/> Incinerator
<input type="checkbox"/> Dry Cleaning Equipment	<input type="checkbox"/> Boiler
<input type="checkbox"/> Emergency Standby Generator or Other Internal Combustion Engine

OWNER'S DESIGNEE FORM
DUST CONTROL PERMIT for CONSTRUCTION ACTIVITIES

An Excavation / Encroachment / Offsite permit for government owned land may be submitted in lieu of this form.

1. DESIGNEE INFORMATION:

Applicant/Permittee: Las Vegas Paving Cop.

Project Name: Asbestos Aatement

2. PROPERTY OWNER INFORMATION:

Property Owner

Easement / Right of Way Holder

Name: Tronox, LLC.

Address: 560 W. Lake Mead Pkwy.

City: Henderson

State: NV

ZIP: 89015

Phone: 259-7727

Ext: _____

Fax: 651-2310

I certify that the property owner and/or easement/right-of-way holder has given me permission to act as the Designee and to act on his/her behalf in all matters regarding the issuance, modification, closure and all requirements of the DUST CONTROL PERMIT for Construction Activities. I understand that I am responsible for dust control on the property listed on this application until such time that the permit is closed in accordance with Air Quality Regulations. I have completed the Dust Control Class or will complete the Class, no later than thirty (30) days from today's date. Furthermore, I understand that I am responsible for ensuring the contractor(s), subcontractor(s), and all other persons associated with the Project comply with the "Conditions of Permit" and "Dust Mitigation Plan".

I declare under penalty of perjury that the foregoing is true and correct.

DUST MITIGATION PLAN FOR
Asbestos Abatement

Prepared for:

Clark County Department
Of Air Quality & Environmental Management
500 South Grand Central Parkway
1st Floor
Las Vegas, Nevada 89155

Prepared By:

Las Vegas Paving Corp.
4420 S. Decatur Boulevard
Las Vegas, Nevada 89103

August 17, 2010

A. Project Description

1. This project consists of the removal and disposal of contaminated soils. The soil type that will be encountered during this project is listed as Moderate high. This designation was determined from figures 3 and 4 'Valley Soil Types Map' located in the Construction Activities Notebook.
2. A map for the project is included within this application.

B. Development Plan

1. Las Vegas Paving anticipates this project to continue for 10 months.

C. Estimated Proposed Expenditure

1. The costs for the miscellaneous products anticipated to be used on this project are as follows:

Water Truck with Driver	\$92.00 per Hour
Water	\$3.00 per 1,000 gallons
Surfactant	\$3.50 per 1,000 gallons of water

For this project, Las Vegas Paving anticipates that the water truck, operator, and water consumption will cost approximately \$124,983.00

D. Control Measures

All control measures are listed in the previous section.

E. Water Source Identification

Hydrants will be used to fill water trucks.

F. Soil Stabilization Measures

Las Vegas Paving plans on using water as our primary source of Dust Control. If water is not effective alone, then a surfactant will be added to the water at a rate of no less than 2 gallon per 4,000 gallons of water. Las Vegas Paving will keep records of any surfactant used for this project.

G. Employee Dust Control Training and Compliance

Mr. Tony Hainey the Project Superintendent will supervise the activities for this project. Mr. Hainey will work closely with Mr. Troy Hildreth, Las Vegas Paving's Environmental Department, if situations occur that conflicts with this mitigation plan.

CONTROL MEASURES SELECTION PAGES

DISTURBED LAND – Long-Term Stabilization

BMP 11

YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.

Requirement: Stabilize soil to meet standards required by Air Quality Regulation Section 90.

- 11-1 Apply and maintain a dust palliative on disturbed soils for long-term stabilization.
- 11-2 Stabilize disturbed soil with vegetation for long-term stabilization.
- 11-3 Pave or apply surface rock for long-term stabilization.
- 11-4 Use wind breaks in accordance with a site-specific plan approved by the Control Officer and Region IX Administrator of the EPA.
- 11-5 Apply water and maintain soils in a visible damp or crusted condition for temporary stabilization.

Requirement: Prevent access to limit soil disturbance.

- 11-6 Prevent access by fencing, ditches, vegetation, berms or other suitable barrier or means approved by the Control Officer.

Recommendations: Plant perimeter vegetation early. Use of native and drought-tolerant plants with greater than 50 % silhouette area is encouraged.

CONTROL MEASURES SELECTION PAGES

BACKFILLING

BMP 01

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Stabilize backfill material when not actively handling.

- 01-1 Water backfill material to maintain moisture or to form crust when not actively handling.
- 01-2 Apply and maintain a dust palliative to backfill material to form crust when not actively handling.
- 01-3 Cover or enclose backfill material when not actively handling.

Requirement: Stabilize backfill material during handling.

- 01-4 Empty loader bucket slowly and minimize drop height from loader bucket.
- 01-5 Dedicate water truck or large hose to backfilling equipment and apply water as needed.

Note: Select at least one of the above; In addition the appropriate control measure for your soil type must be selected from the following.

- 01-6 L: Mix moist soil with dry soil until the optimum moisture is reached.
- 01-7 ML: Apply and mix water into the backfill material until optimum moisture is reached.
- 01-8 MH: Apply and mix water and tackifier solution into the backfill material until optimum moisture is reached.
- 01-9 H: Apply and mix water and surfactant solution into the backfill material until optimum moisture is reached.

Requirement: Stabilize soil at completion of backfilling activity.

- 01-10 Apply water and maintain disturbed soils in a stable condition until permanent stabilization is complete.
- 01-11 Apply and maintain a dust palliative on disturbed soils to form a crust following backfilling activity.

Requirement: Stabilize material while using pipe padder equipment.

- 01-12 Mix moist soil with dry soil until the optimum moisture is reached.
- 01-13 Dedicate water truck or large hose to equipment and apply water as needed.

CONTROL MEASURES SELECTION PAGES

STOCKPILING

BMP 19

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: To the extent possible, maintain stockpile to avoid steep sides or faces.

Requirement: Stockpile location and height must be maintained pursuant to Air Quality Regulations. Stockpiles located within 100 yards of occupied buildings must not be constructed over 8 feet in height.

- 19-1 Stockpiles will not be constructed over 8 feet in height.
- 19-2 Stockpiles will be constructed over 8 feet high and must have a road bladed to the top to allow water truck access or must have a sprinkler irrigation system installed, used and maintained.

Requirement: Stabilize surface soils where support equipment and vehicles will operate.

- 19-3 Pre-water and maintain surface soils in a stabilized condition where support equipment and vehicles will operate.
- 19-4 Apply and maintain a dust palliative on surface soils where support equipment and vehicles will operate.

Requirement: Stabilize stockpile materials during handling.

- 19-5 Maintain stockpile materials with at least 70% optimum moisture content.
- 19-6 Remove material from the downwind side of the stockpile, when safe to do so.

Note: Select at least one of the above; In addition the appropriate control measure for your soil type must be selected from the following:

- 19-7 L & ML: Apply water during stacking, loading and unloading operations.
- 19-8 MH: Apply a water and tackifier mixture during stacking, loading and unloading operations.
- 19-9 H: Apply a water and surfactant mixture during stacking, loading and unloading operations.

(Continued on next page)

CONTROL MEASURES SELECTION PAGES

Requirement: Stabilize stockpiles at completion of activity.

- 19-10 Water stockpiles to form a crust immediately at the completion of activity.
- 19-11 Apply and maintain a dust palliative to all outer surfaces of the stockpiles.
- 19-12 Provide and maintain wind barriers on 3 sides of the pile, whose length is no less than equal to the length of the pile, whose distance from the pile is no more than twice the height of the pile, whose height is equal to the pile height, and made of material with a porosity of 50% or less.
- 19-13 Apply a cover or screen to stockpiles.

CONTROL MEASURES SELECTION PAGES

TRENCHING

BMP 22

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Stabilize surface soils where trenching equipment, support equipment and vehicles will operate.

- 22-1 Pre-water and maintain surface soils in a stabilized condition where trenching equipment, support equipment and vehicles will operate.
- 22-2 Apply and maintain a dust palliative to surface soils where trenching equipment, support equipment and vehicles will operate.

Requirement: Presoak soils prior to trenching activities.

- 22-3 Pre-water surface, pre-trench to 18" depth, soak soils via pre-trench prior to deep trenching.
- 22-4 L & ML: Presoak soil with water using sprinklers or wobblers.
- 22-5 L & ML: Presoak with water, using water truck and/or water pull.
- 22-6 MH: Presoak soil with a water and tackifier mixture using water pulls and/or water trucks.
- 22-7 MH: Presoak soil with a water and tackifier mixture using sprinklers or wobblers.
- 22-8 H: Presoak soil with a water and surfactant mixture using water pulls and/or water trucks.
- 22-9 H: Presoak soil with a water and surfactant mixture using sprinklers or wobblers.

Requirement: Stabilize soil during trenching activities.

- 22-10 L & ML: Complete trenching with a dedicated water truck or large hose maintaining water as needed to prevent dust.
- 22-11 L & ML: Use spray nozzles mounted on trenching machine.
- 22-12 MH: Complete trenching with a dedicated water truck or large hose maintaining a water and tackifier mixture as needed to prevent dust.
- 22-13 H: Complete trenching with a dedicated water truck or large hose maintaining a water and surfactant mixture as needed to prevent dust.

(Continued on next page)

CONTROL MEASURES SELECTION PAGES

Requirement: Stabilize soils at the completion of trenching activities.

- 22-14 Use water to form crust on excavated soil windrow as it is formed.
- 22-15 Use dust palliative to form crust on excavated soil windrow as it is formed.

Recommendations: Wash mud and soil from equipment at completion of trench to prevent crusting and drying of soil on equipment.

See also: BMP 01: BACKFILLING, if applicable.

CONTROL MEASURES SELECTION PAGES

TRUCK LOADING

BMP 23

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: Ensure all loads are covered prior to leaving the construction site and traveling on public roadways.

Requirement: Stabilize surface soils where loaders, support equipment and vehicles will operate.

- 23-1 Pre-water and maintain surface soils in a stabilized condition where loaders, support equipment and vehicles will operate.
- 23-2 Apply and maintain a dust palliative on surface soils where loaders, support equipment and vehicles will operate.

Requirement: Stabilize material during loading.

- 23-3 Empty loader bucket slowly and keep loader bucket close to the truck to minimize the drop height while dumping.

Note: You must selected 23-3 if PEP is greater than LOW, in addition one of the following must be selected.

- 23-4 L & ML: Mix material with water prior to loading.
- 23-5 L & ML: Spray material with water while loading.
- 23-6 MH: Mix material with a water and tackifier mixture prior to loading.
- 23-7 MH: Spray material with a water and tackifier mixture while loading.
- 23-8 H: Mix material with a water and surfactant mixture prior to loading.
- 23-9 H: Spray material with a water and surfactant mixture while loading.

Protecting the air we share

Air Quality

CONSTRUCTION SITE DUST CONTROL MONITOR

Air Quality Regulation Section 94.7.5 requires a Dust Control Monitor for any construction project that has 50 acres or more of disturbed soils. This requirement is applicable to multiple sites that are individually permitted at less than 50 acres each, if they are adjacent to one another, under common ownership, or are within a master planned community, and together they have 50 acres or more of disturbed soil.

DEMOLITION - Mechanical/Manual**BMP 09**

**YOU MUST SELECT AT LEAST ONE CONTROL MEASURE FOR EACH REQUIREMENT.
PLACE A CHECK IN THE BOX IN FRONT OF YOUR SELECTION.**

Requirement: For renovation or demolition of a structure, a Demolition Supplemental form (see Appendix A) must be filled out, submitted and approved by the Control Officer prior to commencing demolition.

Requirement: An asbestos survey must be conducted on any facility or structure that is subject to NESHAP requirements before demolition can commence.

Requirement: A complete Clark County NESHAP Notification form must be submitted to the DAQEM at least ten working days prior to demolition. The asbestos survey must be attached to this notification.

Requirement: Stabilize surface soils where support equipment and vehicles will operate.

- 09-1 Pre-water and maintain surface soils in a stabilized condition where support equipment and vehicles will operate.
- 09-2 Apply and maintain a dust palliative to surface soils where support equipment and vehicles will operate.
- 09-3 Area where support equipment and vehicles will operate is completely covered with paving or concrete.

Requirement: Stabilize demolition debris during handling.

- 09-4 Apply water to demolition debris during handling.

Requirement: Stabilize debris following demolition.

- 09-5 Apply water to stabilize demolition debris.
- 09-6 Apply a dust palliative to stabilize demolition debris.

Requirement: Stabilize surrounding area following demolition.

- 09-7 Apply water to stabilize surrounding area following demolition.
- 09-8 Apply and maintain a dust palliative to stabilize surrounding area following demolition.

By signing this permit application I certify that:

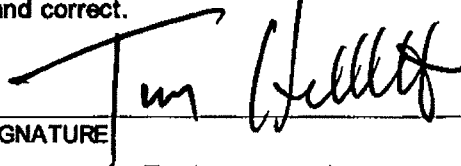

- A. I am authorized, on behalf of the individual or company listed in Section 1, as Applicant/Permittee, to apply for their Dust Control Permit and to commit to all of the terms and conditions of the requested permit.
- B. Construction activities will be limited to lands that the applicant/permittee either owns or is authorized to use for construction activities. The permit issued subsequent to this application is not a substitute for obtaining the property owners permission to use his land. Issuance of a Dust Control Permit is intended only for the purpose of controlling emissions of air pollutants and assuring compliance with Air Quality Regulations. The applicant/permittee agrees to hold harmless, indemnify, and defend Clark County, its employees and assigns from any claims that may arise due to any unauthorized use of land for construction activities.
- C. The permittee accepts responsibility for assuring that all contractors, subcontractors, and all other persons on the construction site covered by this permit, comply with the terms and conditions of the permit, the dust mitigation plan and all applicable Air Quality Regulations.
- D. The applicant/permittee understands that it is a condition of the permit that the permittee agrees to allow the inspection of the site for compliance with the terms and conditions of the permit and Air Quality Regulations at any time during the permittee's hours of operation by a DAQEM officer without prior notice or at any time pursuant to the investigation of a complaint or upon direct observation of emission and/or failure to maintain Best Management Practices.
- E. I understand that any material misrepresentation made in this application may invalidate the permit and that Clark County may pursue enforcement action against me. In addition, I understand any willful misrepresentation may result in criminal penalties. I declare under penalty of perjury that the foregoing is true and correct.

Submit completed form to DAQEM or FAX to (702) 383-9994

1. PERMIT INFORMATION:

Permit Number: 38851 *M-7* Project Name: Asbestos Abatement
Applicant/Permittee: Las Vegas Paving Corp.
Project Address/Location: 560 W. Lake Mead Pkwy. Tronox Facility

2. CLOSURE INFORMATION:

Permittee Statement

By submitting this form I verify no further soil disturbing construction activities will occur at the above referenced location. All project soils designated in the Dust Control Permit have been permanently stabilized by the following method(s) (Check all that apply):

- Permitted area built out - no disturbed soil areas remain.
- Ground cover and/or dust palliative have been applied to areas not built out.
- Less than a 1/4 acre of disturbed soil remains.
- An application for a new Dust Control Permit has been submitted, for remaining disturbed areas.

I further verify I have inspected the site for the following items, with the results indicated:

- Unpaved roads or easements are remaining on or accessing the permitted site. Yes No
- Unpaved areas remain on the site that could be used for parking or storage lots. Yes No

Print Name: Troy Hildreth 510-1278 Date: 11-04-2011

Send me this form upon completion of inspection. Yes No;

If yes FAX #: 257-9436 or Email address thildreth@lasvegaspaving.com

DAQEM use only

Inspection Results

Are any unpaved roads, easements or parking/storage lots on the permitted site? Yes No

An inspection by a DAQEM Enforcement Officer has been performed with the following results:

- Construction is complete and the site has been built out or stabilized with landscaping. (PASS)
- Construction has ceased and all areas that are not built out have been adequately treated for long-term stabilization. (PASS)
- Construction has ceased, but certain areas of the site (specify in 'Notes') have not been adequately treated for long-term stabilization. (FAIL)
- Construction has ceased, but the entire site has not been adequately treated for long-term stabilization. (FAIL)
- Construction has not ceased, but site has less than 1/4 acre of disturbed area remaining.
- This permit replaced with permit(s). # _____
- This site will require an ATC/OP. (list equipment in 'Notes')

Notes: Project complete. Any further work will require another permit.

Henderson, NV 89011

Project Number: 100633

On December 17, 2010 you submitted a project notification in accordance with the provisions of Air Quality Regulation Section 13, which adopts by reference 40 CFR Part 61.145. DAQEM has reviewed the notification and considers it to be complete.

In the notification, you reported your company will be removing soil with TSI, Asbestos Packing and other Unknown Materials of which 243000 cubic feet contains regulated asbestos containing material at Tronox, 560 West Lake Mead, Beta Ditch, North of the Control Lab, Henderson, NV, 89015. Your request for a waiver of the 10 working day requirement has been denied. The projected start date is January 4, 2011 with a completion date of February 28, 2011.

If there are any changes to the start date, contact DAQEM immediately, prior to the actual start date. If any of the information on the notification form changes, send in a revised notification. All revised notifications must be mailed or hand delivered to our office. Every revised notification must have an original "wet" signature. Revised notifications that are faxed and emailed will not be accepted. Use the project number listed above for all modifications and whenever referring to this project.

If you have any questions, please contact me.

Renewal: No * If this is a Renewal Application, NO filing fee is required.

Submission of this Electronic Notice of Intent constitutes notice that the Permittee identified in this request intends to be authorized by a National Pollutant Discharge Elimination System (NPDES) permit issued for storm water discharges in the State of Nevada and has or will comply with the following:

1. The Permittee will comply with all applicable permit conditions,
2. The Permittee understands that implementation of the Storm Water Pollution Prevention Plan, which is required under by the General Permit will begin at the time the permittee commences work on the project identified in Section I of this application,
3. The Permittee understands that failure to submit the required \$200.00 fee and this signed Section Certification within 30 days of the electronic submittal will result in failure for eligible coverage under the General Permit; and,
4. That Nevada Administrative Code (NAC) 445A.268 Section (5)(b) reads, in part, that a Permittee (discharger) who is covered under a general permit shall pay to the Director a nonrefundable fee of \$200 not later than July 1 of each year that the discharger is covered under that permit.
5. To Terminate coverage of the Nevada NPDES General Permit for Stormwater Discharges, the Permittee must submit a Notice of Termination ("NOT") form when their facilities no longer have any stormwater discharges associated with Construction activity as defined in the Nevada's General Stormwater Permit or EPA regulations at 40 CFR 122.26, or when they are no longer the operator of the site.

For Construction sites, elimination of all stormwater discharges associated with construction activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the native cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geo-textiles) have been employed.

Please mail the filing fee of \$200.00 along with this notice to:

Stormwater Coordinator 3173
Bureau of Water Pollution Control
Nevada Division of Environmental Protection
901 South Stewart Street, Suite 4001
Carson City, NV 89701-5249

Should you have any questions, please call Bonnie Hartley at (775) 687-9430.

NOI Certification Statement

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. I also confirm that a storm water pollution prevention plan (SWPPP) has been completed, will be maintained at the project site from the start of construction activities, and that the SWPPP will be compliant with any applicable local sediment and erosion control plans. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines for knowing violations.

Notice of Termination ("NOT") of Coverage under the National Pollutant Discharge Elimination System (NPDES) Permit Issued for Stormwater Discharges Associated with Mining, Industrial or Construction Activity

Submission of this NOT constitutes notice that the operator identified below is no longer authorized to discharge stormwater associated with Mining, Industrial, or Construction activity under the NPDES program. This form and other information are available at: <http://www.state.nv.us/ndep/bwpc/storm01.htm>.

Any questions concerning this form should be directed to the address below or to:
Bonnie Hartley at (775) 687-9430 bhartley@ndep.nv.gov.

Submit the completed form to:
Stormwater Coordinator 3173
Nevada Division of Environmental Protection
Bureau of Water Pollution Control
901 S. Stewart St., Suite 4001
Carson City, NV 89701

I. PERMIT INFORMATION

Have all operations associated with this permit been terminated in accordance with applicable permit conditions?

Yes No

If No, provide reason for submission of this Notice of Termination:

Permit Identification Number (e.g. CSW-xxxx, ISW-xxx, or MSW-xxxx):

Date of Termination: Date Format: XX/XX/XXXX

Are you filing this NOT due to a change in ownership or operator? Yes No

If yes, please attach a letter stating that the new owner and/or operator will assume responsibility for stormwater activity at the permitted site as permitted by NPDES Stormwater General Permit. **THIS LETTER MUST BE SIGNED BY THE PERMITTEE ACCEPTING RESPONSIBILITY AND INCLUDE THE SITE ID NUMBER.**

II. SITE OWNER/OPERATOR INFORMATION

Name: Las Vegas Paving Corp. Phone: (702) 510-1278
Address: 4420 S. Decatur Blvd.
City: Las Vegas State: NV ZIP Code: 89103
Email address: thildreth@lasvegaspaving.com

III. NEW SITE OWNER/OPERATOR INFORMATION (If applicable)

Name: Phone:
Address:
City: State: ZIP Code:
Email address:

Has a new NOI been submitted? Yes No If yes, what is the new Site ID Number?
(e.g. CSW-xxxx, ISW-xxx, or MSW-xxxx) -

IV. SITE LOCATION INFORMATION

Name: Tronox LLC Phone: 510-1278
Address: 560 W. Lake Mead
City: Henderson State: NV ZIP Code: 89015
APN: 17813101002

V. CERTIFICATION

I certify under penalty of law that all stormwater discharges associated with Mining, Industrial, or Construction activity from the identified site that is authorized by the General Permit have been eliminated or that I am no longer the operator at the site. (Elimination of all stormwater discharges associated with construction activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the native cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geo-textiles) have been employed.) I understand that by submitting this notice of termination, I am no longer authorized to discharge stormwater associated with Mining, Industrial or Construction activity under the NPDES Stormwater General Permit, and that discharging pollutants in stormwater associated with Mining, Industrial or Construction activity to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by an NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

Dear: MRS. SUSAN CROWLEY

Re: Stormwater General Permit: NVR100000

Project ID Number: CSW-19689

Project Name: Tronox #2

Your submittal to be included under the Stormwater General Permit has been approved effective 01/14/2011. Please note that by submitting an NOI the permittee has certified that the project's Storm Water Pollution Prevention Plan (SWPPP) has been completed, that the SWPPP will be updated as necessary, and that it will be maintained at the permitted site.

At the time of any on-site inspections, our inspectors will ask to review your copy of the SWPPP in an effort to ensure proper compliance with the program.

Also note that Nevada Administrative Code (NAC) 445A.268 Section (5)(b) reads, in part, that a Permittee (discharger) who is covered under a general permit shall pay to the Director a nonrefundable fee of \$200 not later than July 1 of each year that the discharger is covered under that permit.

To Terminate coverage of the Nevada NPDES General Permit for Stormwater Discharges, the Permittee must submit a Notice of Termination ("NOT") form when their facilities no longer have any stormwater discharges associated with Construction activity as defined in the Nevada's General Stormwater Permit or EPA regulations at 40 CFR 122.26, or when they are no longer the operator of the site.

Should you have any questions, I can be reached at (775) 687-9434.

Renewal: NO

* If this is a Renewal Application, NO filing fee is required.

Submission of this Electronic Notice of Intent constitutes notice that the Permittee identified in this request intends to be authorized by a National Pollutant Discharge Elimination System (NPDES) permit issued for storm water discharges in the State of Nevada and has or will comply with the following:

1. The Permittee will comply with all applicable permit conditions,
2. The Permittee understands that implementation of the Storm Water Pollution Prevention Plan, which is required under by the General Permit will begin at the time the permittee commences work on the project identified in Section I of this application,
3. The Permittee understands that failure to submit the required \$200.00 fee and this signed Section Certification within 30 days of the electronic submittal will result in failure for eligible coverage under the General Permit; and,
4. That Nevada Administrative Code (NAC) 445A.268 Section (5)(b) reads, in part, that a Permittee (discharger) who is covered under a general permit shall pay to the Director a nonrefundable fee of \$200 not later than July 1 of each year that the discharger is covered under that permit.
5. To Terminate coverage of the Nevada NPDES General Permit for Stormwater Discharges, the Permittee must submit a Notice of Termination ("NOT") form when their facilities no longer have any stormwater discharges associated with Construction activity as defined in the Nevada's General Stormwater Permit or EPA regulations at 40 CFR 122.26, or when they are no longer the operator of the site.

For Construction sites, elimination of all stormwater discharges associated with construction activity occurs when disturbed soils at the construction site have been finally stabilized and temporary erosion and sediment control measures have been removed or will be removed at an appropriate time. Final stabilization means that all soil-disturbing activities at the site have been completed, and that a uniform perennial vegetative cover with a density of 70% of the native cover for unpaved areas and areas not covered by permanent structures has been established, or equivalent permanent stabilization measures (such as the use of riprap, gabions, or geo-textiles) have been employed.

Please mail the filing fee of \$200.00 along with this notice to:

Stormwater Coordinator 3173
Bureau of Water Pollution Control
Nevada Division of Environmental Protection
901 South Stewart Street, Suite 4001
Carson City, NV 89701-5249

Should you have any questions, please call Bonnie Hartley at (775) 687-9430.

NOI Certification Statement

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gathered and evaluated the information submitted. I also confirm that a storm water pollution prevention plan (SWPPP) has been completed, will be maintained at the project site from the start of construction activities, and that the SWPPP will be compliant with any applicable local sediment and erosion control plans. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fines for knowing violations.

ANNUAL INVOICE: GENERAL STORMWATER PERMIT FEE FOR FISCAL YEAR: 2012

TO: MR. TROY HILDRETH
LAS VEGAS PAVING CORP
4420 S DECATUR
LAS VEGAS NV 89103

05/05/2011

FOR: Site Name: TRONOX #2
Site ID/Invoice Number: CSW- 19689
Annual Fee Due: July 1, 2011
Total Amount Due: \$200

This invoice is a result of a permit that is currently held under one or both of the names listed above.

In accordance with Nevada Administrative Code (NAC) 445A.268 Section (5)(b) in part, a Permittee (discharger) who is covered under a general permit shall pay to the Director a nonrefundable fee of \$200 not later than July 1 of each year that the discharger is covered under that permit. Additionally, please note, in accordance with NRS 353.1467, payments to the State for \$10,000 or more must be paid electronically beginning July 1, 2008. Governmental entities are exempt. To enable electronic fee payment, starting on July 1, 2008, NDEP will accept E-check payments of any amount through our secure website <http://www.ndep.nv.gov/epayments>.

To terminate coverage of the Nevada NPDES General Permit for Stormwater Discharges, the Permittee must submit a Notice of Termination ("NOT") form when their facilities no longer have any stormwater discharges associated with construction activity as defined in the Nevada's General Stormwater Permit. **Please note, any "NOT's" that come in to our office after July 1st will be subject to pay the annual fee no matter the completion date of the project.** <http://ndep.nv.gov/bwpc/storm01.htm>.

Transfer of Ownership or Control: If control or ownership of the construction project changes, both the permittee and the succeeding owner or controller will complete a Notice of Change ("NOC") form in order to transfer permit coverage. All transfer of permits shall be approved by NDEP. <http://ndep.nv.gov/bwpc/storm01.htm>.

ALL DOCUMENTS SUBMITTED TO THIS OFFICE MUST HAVE AN ORIGINAL SIGNATURE(S).

If you have any questions or concerns, please call Stormwater Assistance at (775) 687-9430.

PLEASE RETURN THIS STUB WITH PAYMENT

If paying by paper check please make checks payable to "NDEP - BWPC". Remit payment to: Stormwater Coordinator 3173, NDEP - BWPC, 901 South Stewart Street Suite 4001, Carson City, NV 89701.

Notice of Termination ("NOT") for Coverage under a General National Pollutant Discharge Elimination System ("NPDES") Permit

Submission of this NOT constitutes notice that the operator identified below is no longer authorized to discharge stormwater associated with construction activities, industrial activities or mining activities under the NPDES program. This form and other information are available at: <http://www.state.nv.us/ndep/bwpc/storm01.htm>.

Any questions concerning this form should be directed to the address below or to: Michele "Mickie" Reid at (775) 687-9434 mreid@ndep.nv.gov, Bonnie Hartley at (775) 687-9430 bhartley@ndep.nv.gov or Steve McGoff, P.E. at (775) 687-9429 smcgoff@ndep.nv.gov.

Submit the completed form to: Stormwater Coordinator 3173
Nevada Division of Environmental Protection
Bureau of Water Pollution Control
901 S. Stewart St., Suite 4001
Carson City, NV 89701.

I. PERMIT INFORMATION

Have all operations associated with this permit been terminated in accordance with applicable permit conditions?

Yes No

If No, provide reason for submission of this Notice of Termination:

Permit Identification Number: CSW- 19689; ISW- _____; MSW- _____

Date of Termination: 11/4/2011

Are you filing this NOT due to a change in ownership and/or operator? Yes No

If yes, please attach a signed Notice of Change ("NOC") form stating that the new owner and/or operator will assume responsibility at the site while the site is authorized to discharge stormwater associated with construction, industrial or mining activities. The NOC form can be found at:

http://ndep.nv.gov/bwpc/docs/construction_noc_2009.pdf.

II. SITE OWNER/OPERATOR INFORMATION

Name: LAS VEGAS PAVING CORP. Phone: 702-251-5800
Address: 4420 S DECATUR
City: LAS VEGAS State: NV ZIP Code: 89103
Email address: THILDRETH@LASVEGASPAVING.COM

III. NEW SITE OWNER/OPERATOR INFORMATION (If applicable)

Name: _____ Phone: _____
Address: _____
City: _____ State: _____ ZIP Code: _____
Email address: _____

Has a new NOI been submitted? Yes No

If yes, what is the new Permit Number? CSW-_____; ISW-_____; MSW-_____

IV. SITE LOCATION INFORMATION

Name: TRNOX #2 Phone: 510-1278
Address: 560 LAKE MEAD
City: HENDERSON State: NV ZIP Code: _____
APN: 17812401002

V. CERTIFICATION

I certify under penalty of law that all stormwater discharges associated with construction activity, industrial activity or mining activity from the identified site that is authorized by an NDEP General Permit have been eliminated or that I am no longer the operator at the construction site. I understand that by submitting this notice of termination, I am no longer authorized to discharge stormwater associated with construction activity under General Permit NVR100000, industrial activity under General Permit NVR050000 or mining activity under General Permit NVR030000 and that discharging pollutants in stormwater associated with either of these activities to waters of the United States is unlawful under the Clean Water Act where the discharge is not authorized by an NPDES permit. I also understand that the submittal of this Notice of Termination does not release an operator from liability for any violations of this permit or the Clean Water Act.

APPROVED
BY _____ DATE _____

RE: Enforcement Action for Failure to Complete Approved Site Remediation Activities, and Show Cause Meeting, Tronox, LLC, (Tronox) Henderson, Nevada, NDEP Facility ID Number 8-000539

Dear Mr. Foster:

Enclosed please find a Finding of Alleged Violation, Order, and State Environmental Commission Form #3. This enforcement action is the result of the failure of Tronox, its predecessors in interest and affiliates to complete approved remediation activities for the known contamination in both soil and groundwater at the Tronox facility located within the Black Mountain Industrial ("BMI") Complex, 8000 West Lake Mead Parkway, Henderson, Nevada. Nevada Division of Environmental Protection (the "Division") facility ID Number H-000539. Among other things, the enforcement action seeks injunctive relief to ensure compliance with Tronox's remediation obligations going forward.

The enclosed Order requires a representative of Tronox to appear before the Division to show cause why the Division should not proceed with an action for injunctive or other relief in District Court. Any violation of the terms of this Order could subject you to an action for appropriate relief pursuant to NRS 445A.695, 445A.700, 445A.705, 459.580, or 459.585.

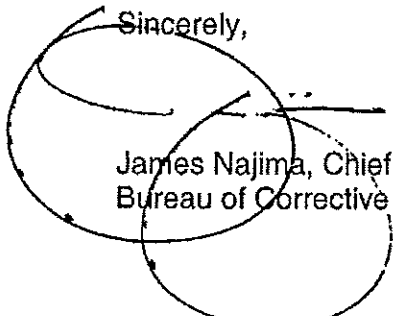

Pursuant to NRS 445A.690, this Order is final and not subject to review unless, within thirty (30) days after the date the Order is served, a request by written petition for a hearing is received by the State Environmental Commission, John Walker, Executive Secretary, via mail to 901 South Stewart Street, Suite 4001, Carson City, Nevada 89701, or via facsimile to (775) 687-5856. I have included the appropriate form for an appeal hearing (Form #3) for your convenience. Please provide me with a copy of any correspondence you have with the Commission.

ORDER

This Order is issued under the authority vested in the Director of the Department of Conservation and Natural Resources ("Department") by Nevada Revised Statutes (NRS) 445A.445 (1), 445A.450 (8), and 459.470, delegated to the Division of Environmental Protection ("Division") pursuant to NRS 445A.450 (9) and 459.480, and in accordance with NRS 445A.675, 445A.690, 459.565 (1), and 459.570.

On the basis of the attached Finding of Alleged Violation ("FOAV"), which is a part of this Order, the Administrator of the Division, pursuant to authority delegated to him by the Director of the Department of Conservation and Natural Resources, has determined that Tronox, LLC ("Tronox") is in violation of Nevada Water Pollution Control Law, the Nevada Hazardous Waste Law, the Resource Conservation and Recovery Act, the Phase 2 Consent Order, the 1986 Consent Order, and the 2001 Consent Order as outlined in the Finding of Alleged Violation and that, among other remedies, injunction relief is required to ensure Tronox's compliance with its remediation obligations going forward.

IT IS HEREBY ORDERED:

Tronox shall complete the following acts at/or with respect to the Tronox Facility located within the Black Mountain Industrial ("BMI") Complex, 8000 West Lake Mead Parkway in Henderson, Nevada (hereinafter "the Site") by the dates specified:

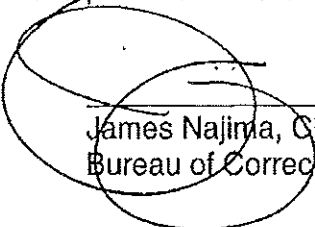

1. Immediately maintain the Site in compliance with all federal, state, and local environmental laws to protect human health and the environment.
2. Within ten (10) days of the date of this Order: Submit to the Division a written reply which states Tronox's intention to comply with the Order including its obligation to maintain the Site in compliance with all federal, state, and local environmental laws to protect human health and the environment.
3. Within sixty (60) days of the date of this Order: Submit to the Division a detailed plan, including a detailed schedule and timeline, that explains how Tronox will ensure that the existing groundwater treatment system ("GWTS") will remain fully operational, as defined herein, until the remedial actions are completed.

a. The term "fully operational" is defined as the pumping and treating of impacted groundwater in accordance with the Administrative Orders on Consent issued by the Division on the following dates: September 9, 1986; April 25, 1991; August 1, 1996; July 26, 1999; October 8, 2001; and April 12, 2005; the following NDEP Bureau of Water Pollution Control

permits: NV 0023060; NEV2001515; NEV2001516; UNEV94218; and any additional permits and requirements as provided by the Division to determine that adequate capture and treatment is occurring to protect human health and the environment.

4. Within sixty (60) days of the date of this Order: Submit to the Division a detailed plan, including a detailed schedule and time line which explains how Tronox will complete the Remedial Alternative Studies ("RAS") required under the August 1, 1996 Consent Agreement ("the Phase 2 Consent Order"). The RAS documents shall address the issue of source control and reduction, and optimization of groundwater treatment.
5. Within sixty (60) days of the date of this Order: Tronox must provide documentation of financial assurance evidencing the existence of the funds necessary to conduct the required corrective actions at the Site.
6. Within thirty (30) days of the date of this Order: Tronox must present a plan for providing an emergency generator system for the GWTS or an alternate plan that is acceptable to the Division, to ensure continuous operation of the GWTS system.
7. Within thirty (30) days of the date of this Order: Tronox must provide a schedule for the complete removal of contaminated soils from the Site by December 31, 2010.
8. By December 31, 2010: Tronox must complete source control of contaminated soils at the Site.
9. Within ten (10) days of the date of this Order: Submit to the Division a copy of all insurance policies that are currently being used to fund the environmental activities at the Site, together with documentation evidencing (a) claims and payouts made pursuant to such policies, (b) any expenses incurred as part of any self-insured retention pursuant to such policies, (c) the term of such policy, and (d) and any other information related to coverage concerning the Site.
10. Within ten (10) days of the date of this Order: Contact Jim Najima, Chief of the Bureau of Corrective Actions of the Division to arrange a meeting at the Division's Carson City office to show cause why the Division should not seek civil penalties for the violations cited in the FOAV.

Dec 14, 2009
Date

James Najima, Chief
Bureau of Corrective Actions

FINDING OF ALLEGED VIOLATION

I. This Finding of Alleged Violation is based upon the following:

A. RELEVANT STATUTORY AND REGULATORY AUTHORITY UNDER THE NEVADA WATER POLLUTION CONTROL LAW:

1. It is the policy of the State of Nevada and the purpose of the Nevada Water Pollution Control Law, codified at Nevada Revised Statutes (NRS) 445A.300 to 445A.730 inclusive (the "NWPCL"), "(a) to maintain the quality of the waters of the State consistent with the public health and enjoyment, the propagation and protection of terrestrial and aquatic life, the operation of existing industries, the pursuit of agriculture, and the economic development of the State, and (b) to encourage and promote the use of methods of waste collection and pollution control for all significant sources of water pollution (including point and diffuse sources)."
2. The State of Nevada, Department of Conservation and Natural Resources, Division of Environmental Protection (the "Division"), under the authority of NRS 445A.445 (1) and 459.475, has the power and the duty to administer and enforce the provisions of the NWPCL.
3. The Division is authorized by NRS 445A.675 and 445A.690 to make findings and issue orders to address violations of the NWPCL.
4. NRS 445A.465 states:

Injection of fluids through a well or discharge of pollutant without a permit prohibited; regulations:

1. Except as authorized by a permit issued by the department pursuant to the provisions of NRS 445A.300 to 445A.730, inclusive, and regulations adopted by the commission, it is unlawful for any person to:

- (a) Discharge from any point source any pollutant into any waters of the state or any treatment works.
- (c) Discharge from a point source a pollutant or inject fluids through a well that could be carried into the waters of the state by any means.
- (d) Allow a pollutant discharged from a point source or fluids injected through a well to remain in place where the pollutant or fluids could be carried into waters of the state by any means.

5. The Division may issue an Order requiring the owner or operator of a property whereon hazardous waste, hazardous substances and/or regulated substances are released to take corrective action to address soil contamination pursuant NAC 445A.227, and to provide a plan and schedule for completing corrective action pursuant to NAC 445A.2271.
6. The Division may issue an Order requiring the owner or operator of a property whereon hazardous waste, hazardous substances and/or regulated substances are released to take corrective action to address groundwater contamination pursuant NAC 445A.22725, and to provide a plan and schedule for completing corrective action pursuant to NAC 445A.2273.

B. RELEVANT STATUTORY AND REGULATORY AUTHORITY UNDER THE NEVADA HAZARDOUS WASTE LAW:

1. It is the purpose of the Nevada Hazardous Waste Law codified at NRS 459.400 to 459.600 inclusive (the "NHWL"), to "(1) Protect human health, public safety and the environment from the effects of improper, inadequate or unsound management of hazardous waste; (2) Establish a program for regulation of the storage, generation, transportation, treatment and disposal of hazardous waste; and (3) Ensure safe and adequate management of hazardous waste."
2. The Division has the power to enforce all rules, regulations and standards promulgated by the Nevada State Environmental Commission (the "SEC") under the NHWL pursuant to NRS 459.475 (1), to act as the state agency for the purposes of federal laws and regulations on hazardous waste pursuant to NRS 459.470, as delegated pursuant to NRS 459.480.
3. Pursuant to NRS 459.565, if the Division receives information that the handling, storage, transportation, treatment or disposal of any waste or hazardous substance at a facility may present an *"imminent and substantial hazard to human health, public safety or the environment,"* it may issue an order to the owner or operator of the facility or the custodian of the hazardous waste to take all necessary steps to prevent the act or eliminate the practice which constitutes the hazard. The Division may also order a site assessment to be conducted and a remediation plan to be developed, assess costs and expenses incurred by the Division in removing, correcting or terminating any hazard to human health, public safety or the environment, seek injunctive relief; and take any other action designed to reduce or eliminate the hazard.

4. NAC 459.9533 defines "Ammonium Perchlorate" as a highly hazardous substance, per all applicable thresholds.
5. Per the United States Environmental Protection Agency, National Center for Environmental Assessment, "Hexavalent Chromium" is classified as a human carcinogen. See <http://www.epa.gov/ncea/iris/toxreviews/0144-tr.pdf> chromium.
6. Pursuant to NRS 459.570, the Division has the power to issue orders to address violations of the NHL, including any regulation, or term or condition of a permit issued by the Division.
7. Nevada adopts and enforces the regulations applicable to the Resource Conservation and Recovery Act ("RCRA"). NAC 444.8632 states in part: Compliance with federal regulations adopted by reference. In addition to the requirements of NAC 444.850 to 444.876, inclusive, a person who generates, transports, treats, stores, disposes or otherwise manages hazardous waste or used oil shall comply with all applicable requirements of, and may rely upon applicable exclusions or exemptions under, 40 C.F.R. Part 2, Subpart A, Part 124, Subparts A and B, Parts 260 to 270, inclusive, Part 273 and Part 279, as those provisions existed on July 1, 2007, which, except as otherwise modified by NAC 444.86325, 444.8633 and 444.8634, are hereby adopted by reference. The Commission may use federal statutes and regulations that are cited in 40 C.F.R. Part 2, Subpart A, Part 124, Subparts A and B, Parts 260 to 270, inclusive, Part 273 and Part 279 to interpret these sections and parts.
8. RCRA defines a "solid waste management unit" as "any discernable unit at which solid wastes have been placed at any time, irrespective of whether the unit was intended for the management of solid or hazardous waste. Such units include any area at a facility at which solid wastes have been routinely and systematically released." 55 Fed. Reg. 30808 (1990).
9. In relevant part, RCRA 3004 addresses solid waste management units as follows:

(u) Continuing releases at permitted facilities

Standards promulgated under this section shall require, and a permit issued after November 8, 1984, by the Administrator or a State shall require, corrective action for all releases of hazardous waste or constituents from any solid waste management unit at a treatment, storage, or disposal facility seeking a permit under this subchapter, regardless of the time at which waste was placed in such unit. Permits issued under section 6925 of this title shall contain schedules of compliance for such corrective action (where such corrective action

cannot be completed prior to issuance of the permit) and assurances of financial responsibility for completing such corrective action.

(v) Corrective action beyond facility boundary

As promptly as practicable after November 8, 1984, the Administrator shall amend the standards under this section regarding corrective action required at facilities for the treatment, storage, or disposal, of hazardous waste listed or identified under section 6921 of this title to require that corrective action be taken beyond the facility boundary where necessary to protect human health and the environment unless the owner or operator of the facility concerned demonstrates to the satisfaction of the Administrator that, despite the owner or operator's best efforts, the owner or operator was unable to obtain the necessary permission to undertake such action. Such regulations shall take effect immediately upon promulgation, notwithstanding section 6930(b) of this title, and shall apply to--

(1) all facilities operating under permits issued under subsection (c) of this section, and

(2) all landfills, surface impoundments, and waste pile units (including any new units, replacements of existing units, or lateral expansions of existing units) which receive hazardous waste after July 26, 1982.

Pending promulgation of such regulations, the Administrator shall issue corrective action orders for facilities referred to in paragraphs (1) and (2), on a case-by-case basis, consistent with the purposes of this subsection.

10. 40 C.F.R. 260.10 defines a "Facility" subject to RCRA regulation as:

(1) All contiguous land, and structures, other appurtenances, and improvements on the land, used for treating, storing, or disposing of hazardous waste, or for managing hazardous secondary materials prior to reclamation. A facility may consist of several treatment, storage, or disposal operational units (e.g., one or more landfills, surface impoundments, or combinations of them).

(2) *For the purpose of implementing corrective action under 40 CFR 264.101 or 267.101, all contiguous property under the control of the owner or operator seeking a permit under Subtitle C of RCRA. This definition also applies to facilities implementing corrective action under RCRA Section 3008(h).*

(3) Notwithstanding paragraph (2) of this definition, a remediation waste management site is not a facility that is subject to 40 CFR 264.101, but is subject to corrective action requirements if the site is located within such a facility.

[Emphasis added.]

11. RCRA 3005(e) defines a facility subject to interim status as:

(1) Any person who--

(A) owns or operates a facility required to have a permit under this section which facility--

(i) was in existence on November 19, 1980, or

(ii) is in existence on the effective date of statutory or regulatory changes under this chapter that render the facility subject to the requirement to have a permit under this section,

(B) has complied with the requirements of section 6930(a) of this title, and

(C) *has made an application for a permit under this section,*

shall be treated as having been issued such permit until such time as final administrative disposition of such application is made, unless the Administrator or other plaintiff proves that final administrative disposition of such application has not been made because of the failure of the applicant to furnish information reasonably required or requested in order to process the application. This paragraph shall not apply to any facility which has been previously denied a permit under this section or if authority to operate the facility under this section has been previously terminated.

[Emphasis added.]

12. Pursuant to RCRA 3008(h), facilities with interim status are subject to corrective action orders. Specifically, RCRA 3008(h) states in part:

(1) Whenever on the basis of any information the Administrator determines that there is or has been a release of hazardous waste into the environment from a facility authorized to operate under section 6925(e) of this title, *the Administrator may issue an order requiring corrective action or such other response measure as he deems necessary to protect human health or the environment* or the Administrator may commence a civil action in the United States district court in the district in which the

facility is located for appropriate relief, including a temporary or permanent injunction.

[Emphasis added].

13. Pursuant to 40 C.F.R. Part 265, Subpart H, the Division may require financial assurance from interim status facilities to ensure the funding of the costs of remediation, including adjustments for current cost estimates of clean-up, inflation, and insufficiency of posted financial assurance .

C. RELEVANT BACKGROUND

1. Kerr-McGee Corporation, Kerr-McGee Chemical, LLC, its affiliates, and successors-in-interest have owned and operated an industrial facility at the BMI Complex in Henderson, Nevada (the "Site") for approximately fifty years. Tronox, LLC took ownership of the Site in or about 2005. These entities are collectively referred to herein as the "Parties."
2. Ending in approximately 1998, the Parties produced ammonium perchlorate, magnesium perchlorate, potassium perchlorate, and sodium perchlorate (collectively, "perchlorate") at the Site. As a result of manufacturing operations at the Site, additional contaminants are found in the groundwater at or near the Site in concentrations above the limits set by the NHL. These contaminants include: hexavalent chromium, perchlorate, asbestos, dioxins, total petroleum hydrocarbons, organochlorine pesticides, aluminum, antimony, arsenic, lead, mercury, radium, thorium, uranium, various semi-volatile and volatile organic compounds. The contaminated groundwater flows into the Las Vegas Wash, into Lake Mead and on to the Colorado River.
3. Pursuant to its authority under the NWPC, and the NHL, the Division issued an Administrative Order on Consent on September 9, 1986 to Kerr McGee Chemical Corporation (the "1986 Consent Order") requiring the remediation of the hexavalent chromium contamination in groundwater. Pursuant to the 1986 Consent Order, the Parties installed a system of monitoring and interceptor wells and groundwater treatment systems at and around the Site and the larger BMI Complex to slow the migration of impacted groundwater.
4. On April 25, 1991, the Division entered an Administrative Order on Consent (the "Phase 1 Consent Order") with land and facility owners within the BMI Complex which set the first phase of a three phase process to investigate, characterize, and if necessary, remediate the hazardous waste releases in the common areas, as well as individually owned sites, within the BMI Complex and surrounding lands and waters.

5. Based upon the reports received pursuant to the Phase 1 Consent Order, the Division issued an Administrative Order on Consent on August 1, 1996 to Kerr-McGee Chemical Corporation (the "Phase 2 Order") to require additional investigation, characterization, and if necessary, remediation of waste releases at or associated with the Site which may pose a threat to human health, welfare, or the environment.
6. In 1997, perchlorate was detected in the Colorado River. The source of this contamination was subsequently traced to the groundwater beneath the Site. On July 26 1999, the Division issued an Administrative Order on Consent to Kerr McGee Chemical, LLC (the "1999 Consent Order"), requiring the establishment of groundwater collection and treatment facilities to remediate this perchlorate contamination.
7. Following the installation of such remedial systems, the Division issued an Administrative Order on Consent to Kerr-McGee Chemical, LLC on October 8, 2001 (the "2001 Consent Order"), and again on April 12, 2005 (the "2005 Consent Order"), modifying and refining the remedial technologies and systems employed at the Site.
8. Since 2007, Basic Remediation Company ("BRC") has managed a Corrective Action Management Unit ("CAMU") pursuant to a RCRA permit to address source contaminants within the BMI Complex. The CAMU has been permitted to accept contaminated soils from individual corporate landowners within the BMI Complex, at significant cost savings due to its proximate location. Upon information and belief, BRC intends to cap off the CAMU in late 2010, thereby precluding any further deposits of contaminated soils.
9. Upon information and belief, Tronox is the beneficiary of an insurance policy with Chartis to address remediation at and around the Site, including the removal of contaminated soils to a CAMU. Upon information and belief, the Chartis insurance policy expires on December 31, 2010.

II. FINDINGS OF ALLEGED VIOLATIONS: The Division finds and alleges as follows:

- A. **FINDING:** Without waiving any claim against Kerr-McGee Chemical Corporation, Kerr-McGee Chemical, LLC, Anadarko Petroleum Corporation, its affiliates, predecessors-in-interest, and successors-in-interest or any other party, the Division finds that Tronox is a successor-in-interest, and an owner and operator of the Site subject to all laws, rules, regulations and standards promulgated by the State Environmental

Commission ("SEC"), and all orders and permits promulgated by the Department, as delegated to the Division.

B. **FINDING:** The Parties are in violation of NAC 445A.227, 445A.2271, 445A.22725, and 445A.2273 of the NWPCL, and NRS 459.565 of the NHWL for failing to complete required assessments and reports of the effectiveness of the pump and treat groundwater system ("the GWTS"). These actions also give rise to the violation of the 1986 Consent Order, the Phase 2 Consent Order and the 2001 Consent Order which were executed in accordance with this authority.

1. Pursuant to its authority under NRS 445A.445 (1), NAC 445A.227, 445A.2271, 445A.22725, and 445A.2273 of the NWPCL, and NRS 459.475(1) and 459.565 of the NHWL, the Division issued multiple administrative orders on consent to the Parties requiring the investigation, characterization, and remediation of releases at or associated with the Site which may pose a threat to human health, welfare, or the environment.
2. Pursuant to the 1986 Consent Order, paragraph 6, the Parties are required to demonstrate on a monthly basis that overlapping cones of depression are achieved. This has not been done, nor has any acceptable alternative been performed or proposed.
3. Pursuant to the 1986 Consent Order, paragraph 7, "If the monitoring results required in Paragraph 6, occurring six (6) months after initial operation of the intercept system, demonstrate that the system is not effectively collecting the intended groundwater plume, the Department may require KMCC to implement the Contingency Plan set forth in Paragraph 8." Paragraph 8 states "KMCC shall prepare and submit to the Department for review and approval an Intercept System Contingency Plan, pursuant to the schedule set forth in Appendix B. This Plan will set forth additional measures to be implemented to improve and update the installed Intercept System to correct, to the extent possible, the deficiencies identified."

According to Appendix B of the 1986 Consent Order "the schedule of implementation for the proposed groundwater mitigation program at the Henderson Facility with time for completion after approval by the Nevada DEP" for the Intercept System Contingency Plan was 7 months. On December 18, 1986, the Division approved the "electrochemical reduction process for chromium-removal". Upon information and belief, this is the approval date referenced in Appendix B, and thus the Intercept System Contingency Plan

should have been submitted in July 1987. Upon information and belief, the Parties failed to submit a contingency plan.

4. Pursuant to the 2001 Consent Order, Section II.B., the Parties are required to install an extraction well system at the Athens Road area of the Site (as further described by the 2001 Consent Order), designed to remove up to 400 gallons per minute of groundwater with the objective of capturing perchlorate flux at this location. As noted herein, the Parties have failed to demonstrate this capture.
5. The Division advised Tronox that the GWTS does not appear to be providing adequate capture at either the Plant Site well field or at the Athens Road well field (each as further described in the Orders).
6. The Division has advised Tronox that the Seep Area well field (as described in the Orders) fails to provide capture of contaminants, and Tronox is currently flow-rate limited to address the Seep Area. The Parties have failed to provide an assessment and report indicating that additional capture is unnecessary in this area, nor have they attempted to capture additional contaminants.
7. The Division advised Tronox to install additional wells and to explore alternate treatment processes such as in-situ bioremediation in the Seep Area.
8. On March 28, 2007, the Division notified Tronox that it must evaluate and report on the effectiveness the GWTS. The Division requires this information so that it may accurately determine the necessity of further corrective action.
9. The Division has attempted to obtain this required information from Tronox informally without success. Between August 29, 2006 and August 28, 2007, the Division reiterated this requirement to Tronox on at least four occasions.
10. Tronox refuses to comply with these directives. Tronox contends that its existing insurance policy under Chartis will not cover multiple treatment systems such as an in-situ bioremediation. And to date, Tronox has refused to install additional wells.
11. Tronox submitted a work plan to evaluate the effectiveness of the GWTS (also known as the Capture Zone Analysis) on May 30, 2007, a revised work plan on August 30, 2007, and a second revised work plan on November 29, 2007.

12. On December 11, 2007, the Division approved the revised work plan dated November 29, 2007.
 13. Tronox has failed to fully implement the approved work plan. Specifically, Tronox has failed to install the required wells in the Seep Area. Without the installation of these wells, any evaluation of the GWTS will be incomplete.
 14. As of the date of this FOAV, Tronox has failed to provide to the Division a complete evaluation of the effectiveness of the GWTS.
- C. **FINDING:** The Parties are in violation of the Phase 2 Consent Order, Section III. Parties Bound. The Phase 2 Consent Order was executed by Kerr-McGee Chemical Corporation. The notification requirements of Section III. regarding change of corporate status have not been complied with.
- D. **FINDING:** The Parties are in violation of the Phase 2 Consent Order, Section IV. Work To Be Performed.
1. On October 3, 2005, the Division agreed to allow Tronox to complete a phased approach to the investigation of the sources of contamination at the Site. The data obtained from the required investigation is to be used to generate a Remedial Alternative Study ("RAS") to fulfill the Parties' obligations under the Phase 2 Consent Order.
 2. Tronox has shown a history of inappropriate delay in the completion of this investigation. Between October 3, 2005 and November 2, 2007, the Division met with Tronox sixteen times to discuss the first phase of this investigation ("Phase A").
 3. After approximately six months of delays and discussions, Tronox implemented and reported to the Division on November 2, 2007.
 4. Between April 5, 2007 and December 4, 2008, the Division met with Tronox twenty-four times to discuss the second phase of this investigation ("Phase B"). The Phase B work plan was broken into six segments - Areas I through IV for soils, one segment for soil gas, and one for site-wide groundwater. Each of these segments required numerous revisions, delays, and Division mark-ups before they were acceptable and approved.
 5. The Phase B Work plan has only recently been completed on November 12, 2009.

6. On October 7, 2009, Tronox discussed the draft results of the Area I Phase B investigation with the Division. To date, Tronox has failed to submit either draft or final results to the Division.
 7. Tronox advised the Division that it will further investigate Area I based upon their initial, and to date undisclosed, results. Additional sampling was proposed on November 19, 2009. Tronox's sampling proposal was wholly deficient, and the Division requested the submission of additional information to complete the sampling proposal.
 8. The Division has repeatedly expressed concern to Tronox and Chartis that remediation appears necessary, and that Tronox and Chartis have failed to provide an appropriate schedule to ensure that this work is completed in a timely fashion.
 9. Tronox's responses to the Division's requests are unacceptable and in bad faith. The Phase 2 Consent Order has been in place for over thirteen years, and Tronox has not produced a RAS for any media (soil, groundwater, etc.) or for any area of the Site, as required by the Phase 2 Consent Order.
 10. Without completion of the Deliverables required by the Phase 2 Consent Order, remediation contemplated by a Phase 3 Consent Order is stalled.
- E. FINDING:** The Parties are in violation of the Phase 2 Consent Order, Section XVII. Reimbursement of Division Oversight Costs. Tronox has failed to reimburse the Division for \$37,024.52 as invoiced on April 6, 2009.
- F. FINDING:** The Parties are in violation of RCRA §§ 3004(u) and 3008(h) and 40 C.F.R. Part 265, Subpart H, and the 1986 Consent Order, paragraph 28. The Parties have failed to provide adequate financial assurance to address the unacceptable risks to human health and the environment posed by the contaminants at the Site.
1. The Site is subject to corrective action under RCRA 3004(u) and 3008(h).
 2. The financial assurance provided by Kerr-McGee Chemical Corporation in the Post Closure Permit Application dated July 24, 1987 is no longer viable as Kerr McGee Chemical Corporation is in default of its financial assurance obligations.

3. Pursuant to the 1986 Consent Order, Paragraph 28, the Parties agreed to unconditionally guarantee performance of its obligations thereunder, and to affirm their financial capability on an annual basis, upon request by the Division.
4. The Division finds that financial assurance provided by Tronox through the Chartis insurance policy is now insufficient.
 - i. Upon information and belief, the Chartis Policy is due to expire on December 31, 2010.
 - ii. Remediation at the Henderson Facility is estimated to take more than ten years, well in excess of the twelve months of coverage remaining under the Chartis Policy.
 - iii. Upon information and belief, the Chartis Policy disallows coverage of in-situ bioremediation in the Seep Area, contrary to the directive of the Division.

G. FINDING: The Parties are in violation of NRS 445A.465 for allowing pollutants discharged from a point source or fluids injected through a well to remain in place where the pollutants or fluids could be carried into the waters of the State by any means.

1. The delays caused by the Parties in violation of the Administrative Orders on Consent as outlined herein have caused undue delay of source control at or around the Site.
2. Over 800,000 cubic yards of contaminated soil are believed to remain on Site, resulting in exponentially higher costs of maintaining the GWTS, and frustrating the process of remediation.
3. The Parties currently have the ability to access the CAMU within the BMI Complex with capacity to hold the contaminated soils from the Site.
4. Immediate source control will significantly reduce the overall costs of the GWTS and remediation.

H. FINDING: The Parties' failure to operate the GWTS will result in imminent degradation of the Las Vegas Wash, Lake Mead and the Colorado River, and an imminent and substantial threat to human health, in violation of NRS 445A.305, NRS 459.400, NAC 445A.144.

1. Based upon the modeling conducted by the Division, with the assumption of a Las Vegas Wash base load of sixty pounds per day of perchlorate, the following is estimated:

)
)
)
)

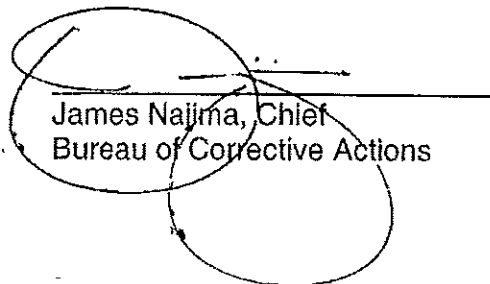

- a. The loading of perchlorate will increase by 23% immediately upon the GWTS being shut down.
 - b. The loading of perchlorate will increase by over 100% within 18 months of the GWTS being shut down.
 - c. The loading of perchlorate will increase by over 860% within 24 months of the GWTS being shut down.
2. Based upon information provided by Veolia Water North America, the operator of the GWTS, the following is estimated:
 - a. The microbial culture used in the GWTS will die within two to three days of the GWTS being shutdown.
 - b. It may take between six and twelve months to reestablish the microbial culture within the GWTS, should it die.
3. Based upon information provided by the Southern Nevada Water Authority (SNWA) and modeling conducted by their environmental contractor Flowscience, the following is estimated:
 - a. Concentrations of perchlorate in Lake Mead are expected to increase by 1200% within 24 months in the event that the GWTS is shut off.
 - b. Concentrations of perchlorate in the Colorado River system and the Metropolitan Water District intake pipeline are expected to increase by 300% within 24 months in the event that the GWTS is shut off.
4. Upon information and belief, over 25 million people rely upon these water bodies as a source of drinking water.
5. The Division finds the degradation of these water bodies is an unacceptable and imminent threat to human health under NRS 445A.305, NRS 459.400, NAC 445A.144.
6. Upon information and belief, Tronox may seek to abandon the Henderson Site after a sale of its assets in bankruptcy. The abandonment of the Site, and/or any loss of power or disabling of the GWTS will cause an imminent and substantial threat to human health. Tronox must present a plan to the Division demonstrating the continuation of the GWTS system, including an emergency

generator back-up system for the GWTS, or an alternate plan that is acceptable to the Division.

III. CONCLUSION: Based upon the information set forth herein, the Nevada Division of Environmental Protection has determined that Tronox, LLC is in violation of the following provisions of the Nevada Administrative Code (NAC), the Nevada Revised Statutes (NRS), the Resource Conservation and Recovery Act (RCRA), and Division Administrative Orders on Consent.

1. NAC 445A.227, 445A.2271, 445A.22725, 445A.2273, and NRS 459.565. Failure to complete required assessments and reports of the effectiveness of the pump and treat groundwater system ("the GWTS").
2. Phase 2 Consent Order, Section III. Parties Bound.
3. Phase 2 Consent Order, Section IV. Work To Be Performed.
4. Phase 2 Consent Order, Section XVII. Reimbursement of Division Oversight Costs.
5. RCRA §§ 3004(u) and 3008(h) and 40 C.F.R. Part 265, Subpart H. Financial Assurance.
6. 1986 Consent Order, paragraph 28. Financial Assurance.
7. NRS 445A.465. Allowing pollutants discharged from a point source or fluids injected through a well to remain in place where the pollutants or fluids could be carried into the waters of the State by any means.
8. NRS 445A.305, NRS 459.400, NAC 445A.144. The Division has a duty to address the imminent and substantial threat to human health and the environment caused by the Site.
