RE: Phase 1 Remedial Investigation Data Validation Summary Report and Electronic Data Deliverable
October through December 2014 Soil Data, Revision 3
Nevada Environmental Response Trust
Henderson, Nevada

Dear Dr. Dong:

The Nevada Environmental Response Trust (NERT) is pleased to present Revision 3 of the Data Validation Summary Report (DVSR) and Electronic Data Deliverable (EDD) for soil data collected from October through December 2014 as part of the NERT Phase 1 Remedial Investigation (RI). This information is being submitted in response to your letter dated April 16, 2019.

In the Trust's October 8, 2018 Revision 2 submittal, DNR qualifiers were added to address NDEP's comment of August 8, 2018 which stated that each sample should have only one value for each analyte, and other values be qualified "DNR" (Do Not Report). In a December 14, 2018 email exchange between NDEP and the Trust, NDEP confirmed that valid results (i.e., results not rejected due to data validation) for constituents analyzed by multiple methods will be included in DVSRs and EDDs without a "DNR" or "R" qualification. Since Revision 2 contained results for constituents that have been analyzed by multiple methods and were qualified DNR, the DVSR and EDD were inconsistent with how data have been qualified in the past, and how data will be qualified in the future. The 2014 Phase 1 Soil Remedial Investigation DVSR and EDD have been revised to remove DNR qualifiers for samples that have results analyzed by multiple methods, consistent with the December 14, 2018 communication between NDEP and the Trust.

If you have any questions or concerns regarding this matter, feel to contact me at (702) 960-4309 or at steve.clough@nert-trust.com.
