NPDES Compliance Coordinator
Nevada Division of Environmental Protection
Bureau of Water Pollution Control
901 South Stewart Street, Suite 4001
Carson City, Nevada 89701-5249

Subject: NPDES Permit NV0023060 – Discharge Monitoring Reports – 3rd Quarter 2012

Dear NPDES Compliance Coordinator:

The Nevada Environmental Response Trust (NERT) maintains NPDES Permit NV0023060 for discharge of treated water, as part of their on-going effort to capture and treat groundwater containing perchlorate in the Henderson area. The attached Discharge Monitoring Reports (DMRs) (Attachment 1) reflect information associated with the remediation efforts, i.e. surface discharge of treated water near the Las Vegas Wash. Included with this correspondence are the July, August and September 2012 DMRs. Analytical summaries are included in Attachment 2, with the supporting analytical reports supplied in electronic format on a CD included in Attachment 3.

During the reporting period, the biological perchlorate remediation process continued to demonstrate compliance with the monthly average perchlorate concentration limitation of 18 µg/L (ppb), except as previously reported to NDEP. Please see correspondence to Mr. Jeryl Gardner, NDEP, on September 28, 2012. As indicated in that correspondence, there was no indication that the perchlorate treatment system was operating abnormally on July 3rd or that perchlorate destruction had been compromised. Note that analyses of "Attachment A" analytes for the treated discharge continue to indicate that there is no significant increase in "other constituents" due to the treatment for perchlorate reduction.

Listed separately are analytical results for four Las Vegas Wash locations, one of which is required for evaluation of the permit's authorized mixing zone (please see the information related to the LVW 5.5 control point), as well as the upgradient on-site groundwater well. Please note the wash location LVW 5.5 was within Table I.2 limits for total dissolved solids (TDS) and total inorganic nitrogen (TIN). Analytical summaries are included in Attachment 2 for your convenience in reviewing the information, with supporting analytical reports provided in electronic format on a CD included in Attachment 3.

During the reporting period, there was no activity regarding permit condition I.A.3.d.ii.

As required by permit condition I.A.20, a report describing the biological process generated solid waste is included as Attachment 4.

Should you have any questions concerning this report, please contact Kimberly Kuwabara at (510) 420-2525 or kkuwabara@environcorp.com or Susan Crowley at (702) 592-7727 or smcrowley@cox.net. Thank you.

NPDES Compliance Coordinator

RE: FBR Biological Solids 3rd Quarter Reporting

To whom it may concern,

The NDEP Authorization to Discharge Permit No. NV0023060 section I.A.11 requires facilities that generate and dispose of sludge to monitor certain constituents; the frequency of monitoring depends on the amount of sludge produced.

The FBR Perchlorate Reduction Process generated 16.46 dry metric tons of biological solids in the Third quarter of 2012. This extrapolates to an expected production of 65.85 metric TPY of dry FBR biological solids.

Attached for your review is the 3rd Quarter 2012 sludge monitoring results reported in mg/kg of dry sludge based on MWH Laboratories analysis (MWH Service Report #401387 for Environ International Corp.)

Please contact me if there are any questions.

Sincerely,
Steve Kubacki

Calculation of Metric Tons of Dry Solids Produced at the FBR

3rd QTR 2012

VWNA Operation's Input Required:	Jul	Aug	Sept
Average % solids of filter press cake	25.06%	22.19%	21.75%
Republic's information on tons of solids hauled, Tons	30.61	29.1	18.47
Less Iron Oxide Sludge, Tons			
==> Wet Tons of FBR Biological solids	30.61	29.1	18.47
==> Wet Metric Tons of FBR Biological solids	27.77	26.40	16.76
==> Metric Tons of DRY FBR Biological solids	6.96	5.86	3.64
==> Average MTPD of dry FBR Biological Solids	0.23	0.19	0.12
==> Predicted MTPY of dry FBR Biological Solids. Note: the permit requires quarterly monitoring for Facilities which produce >290 and <1500 metric tons of dry solids per year.	27.84	23.43	14.58

Total Metric Tons

16.46

65.85
