Bureau of Water Pollution Control
901 South Stewart Street, Suite 4001
Carson City, NV 89701-5249

Subject: UIC Permit # UNEV94218 – Third and Fourth Quarters 2013

Dear UIC Compliance Coordinator:

The Nevada Environmental Response Trust (NERT or the Trust) maintains Underground Injection Control (UIC) Permit #UNEV94218 for groundwater remediation at the NERT site in Henderson, Nevada. Note that injection of stabilized Lake Mead water was suspended as of September 16, 2010, due to soil removal activities surrounding the recharge trenches. This soil excavation is described in the NDEP Bureau of Corrective Actions approved RZ-D Excavation Plan for the Tronox Henderson facility dated July 2010, and was completed in November 2011. Resumption of the injection of stabilized Lake Mead water is under evaluation, but currently injection is not occurring.

Please note that ENVIRON, on behalf of the Trust, submitted a permit renewal application (and associated fees) on March 15, 2013 (at least 180 days prior to permit expiration on September 19, 2013). The Trust has not received a response from the NDEP Bureau of Water Pollution Control (BWPC) regarding renewing the UIC permit.

Pursuant to the permit's Part I.A.4 and Table 1 of Attachment A, collection and analysis of samples of Lake Mead water is required on a quarterly basis. Please note that ENVIRON, on behalf of the Trust, submitted a letter to Mr. Russ Land, NDEP BWPC, on March 18, 2013, requesting relief from the quarterly monitoring requirement for stabilized Lake Mead water while not actively injecting. The request was approved by Mr. Land via e-mail dated April 4, 2013. Therefore, collection and analysis of stabilized Lake Mead water samples was not conducted in third or fourth quarter 2013. Collection and analysis of stabilized Lake Mead water samples will not be conducted unless injection resumes.

In addition, Part I.A.4 and Table 1 of Attachment A of the permit require quarterly groundwater monitoring and collection of groundwater elevations. This information is provided in Attachment 1, together with a monitoring well sample information form. The supporting electronic analytical reports are provided on the CD in Attachment 2. Part I.A.4 Attachment A requires monitoring of the injection and the extraction monthly rate averages. This information is included in Attachment 1. Part I.A.4 Attachment A requires preparation of a potentiometric surface map each quarter. Maps were prepared for both subject quarters, based upon water levels measured in the respective quarters and are included in Attachment 3.

Analysis of total and hexavalent chromium, perchlorate, and total dissolved solids is required in the monitoring wells specified in Table 1 of Attachment A. Well M-84 is listed in Table 1, but has been plugged and abandoned. Analytical data for well M-79 is included in place of M-84; however, hexavalent chromium was not analyzed in well M-79 during 3rd or 4th quarter 2013. Hexavalent chromium analysis will be performed in 1st quarter 2014.

Should you have any questions concerning this report, please contact John Pekala at (602) 734-7710 or jpekala@environcorp.com. Thank you.

Sincerely,

A handwritten signature in blue ink, appearing to read "John M. Pekala", with a long horizontal flourish extending to the right.

Notes:

M-36 damaged in July 2013; data for M-38 included instead.
M-84 plugged and abandoned; data for M-79 included instead.
M-100 dry since August 2011.

H = Sample was prepped or analyzed beyond the specified holding time
HF = Field parameter with a holding time of 15 minutes.

ATTACHMENT A

UNEV 94218: Monitoring Report Requirements

The Permittee shall submit **quarterly reports** on a continuous basis, **whether actively injecting or not**, which contain the following data (please check all information included in the attached report):

The UIC permit number and Attachment A.

The results of the chemical analyses as required by Table 1.

Table 1

PARAMETER	FREQUENCY	LOCATION	LIMITATIONS
VOCs, Total Perchlorate, and Profile I Analysis	Quarterly	Lake Mead Water at Discharge Pipe Prior to Injection	State and Federal Drinking Water Standards. Injectate must not degrade the Groundwater Quality
Total and Hexavalent Chromium	Quarterly	M-11, M-12A, M-36, M-37, M-44, M-84, M-95, and M-100	Monitor and Report
Total Perchlorate, Including NaClO ₄ and NH ₄ ClO ₄	Quarterly	M-11, M-12A, M-36, M-37, M-44, M-84, M-95, and M-100	Monitor and Report
TDS	Quarterly	M-11, M-12A, M-36, M-37, M-44, M-84, M-95, and M-100	Monitor and Report
Injection Rate into Injection trenches and Total Volume injected	Continuously	Discharge Pipe Prior to Injection	100 gpm monthly average. Must be equivalent or less than total extraction rate and volume
Extraction Rate and Total Volume extracted	Continuously	Extraction Wells located Upgradient of Injection Trenches	Cumulative extraction rate must be equivalent or greater than injection rate and volume
Groundwater Elevation and Depth	Quarterly	M-25, M-38, M-80, M-82, M-86, M-95, M-96, M-98, M-99, M-100, and M-102	Monitor and Report

For each month in the reporting period document injection rate (gpm), volume, date, and time injected of Lake Mead water into two injection trenches.

Water level, contour map illustrating groundwater gradient and flow direction.

Summary narrative report of monitoring activities for that reporting period. The report shall include, but not be limited to, any problems encountered with the injection system, the results of any tests performed during that period, and any changes noted to the groundwater. If no injection has occurred, report the non-injection status and the reason the system is not in operation.

UIC Form U230 – Field Sampling & Monitoring Summary

This form is to be completed in the field for all UIC water samples to document the sampling location facts and events, and submitted with the sample results.

Sample Date: (mm/dd/yy) 08/19/13 to 09/05/13 and 11/11/13 to 11/13/13

Complete All Applicable Blanks – Water samples can be rejected if information not provided.

FACILITY AND PERMIT INFORMATION	
Well Name & No.: M-11, M-12A, M-38 (replacement for M-36), M-37, M-44, M-79 (replacement for M-84), M-95, (M-100 dry)	UIC Permit No.: UNEV94218
Is there any well name or identification at the wellhead?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO If no, label should be placed on or near wellhead
Project/Facility Name: Perchlorate Remediation – Nevada Environmental Response Trust, Henderson, NV	
Well Location (Section/TR or Lat/Long) : Section 12 T22S – R62E	
City/Valley: Henderson, NV	County: Clark
Sample for (circle one): NEW WELL <u>ROUTINE REPORTING</u> Other: _____	
Reporting Frequency: <input checked="" type="checkbox"/> Semi-annually <input type="checkbox"/> Annually <input type="checkbox"/> Other _____	
SAMPLE LOCATION or WELL INFORMATION	
Well / Location Type:	Water/Domestic Well <u>Monitoring</u> Geo-Prod Geo-Injection Geo-Observation Discharge Pipe Oil Water Separator Holding Tank Pond Septic Tank Other: _____
(Note: If sample location is not a well (e.g. spring, pond, pipeline, tank), please provide all relevant data on sample location in the space below) Non-well location:	
Completion date of well/tank: 1983 to 1995	
Diameter of casing: 2 to 5 inch	Type of Casing: <u>Steel PVC</u> Other: _____
Total depth of well: 27 to 60 feet below ground surface (bgs)	
Bottom depth of cement for last cemented casing string: NA	
Screened or open hole interval (top/bottom depths): shallowest = 5 to 35 feet bgs; deepest = 40 to 50 feet bgs	
STATUS OF WELL / SAMPLE LOCATION	
Condition or Activity of well during past week/month, prior to sampling: operating normally except wells M-36 (damaged) and M-84 (plugged and abandoned)	
Discuss any field conditions the Division should be aware of with regard to this sample: Quarterly samples were taken during normal operations	
Was the well secured upon arrival?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO
Was there any problems or damage to the well upon arrival	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO, except at M-36
Was well in an artesian condition prior to sampling? :	<input type="checkbox"/> YES <input checked="" type="checkbox"/> NO
WATER LEVEL – WELL GAUGING	
Last date well/sample location (e.g. tank) gauged (mm/dd/yy) : Q3: 9/5 – 9/16/13; Q4: 11/13 – 12/9/13	Depth to water - last event: See below.
Method used to gauge well/location? :	Cap Tube <u>Tape Measure</u> Other: _____
Measured Water Level :	Q3 DTW: M-11 = 42.29', M-12A = 40.09', M-37 = 29.82', M-38 = 29.89', M-44 = 23.53' , M-79 = 29.42', M-95 = 16.42', M-100 = dry Q4 DTW: M-11 = 42.44', M-12A = 40.82', M-37 = 30.27', M-38 = 30.02' , M-44 = 23.69' , M-79 = 29.92', M-95 = 16.45', M-100 = dry

UIC Form U230 – Field Sampling & Monitoring Summary

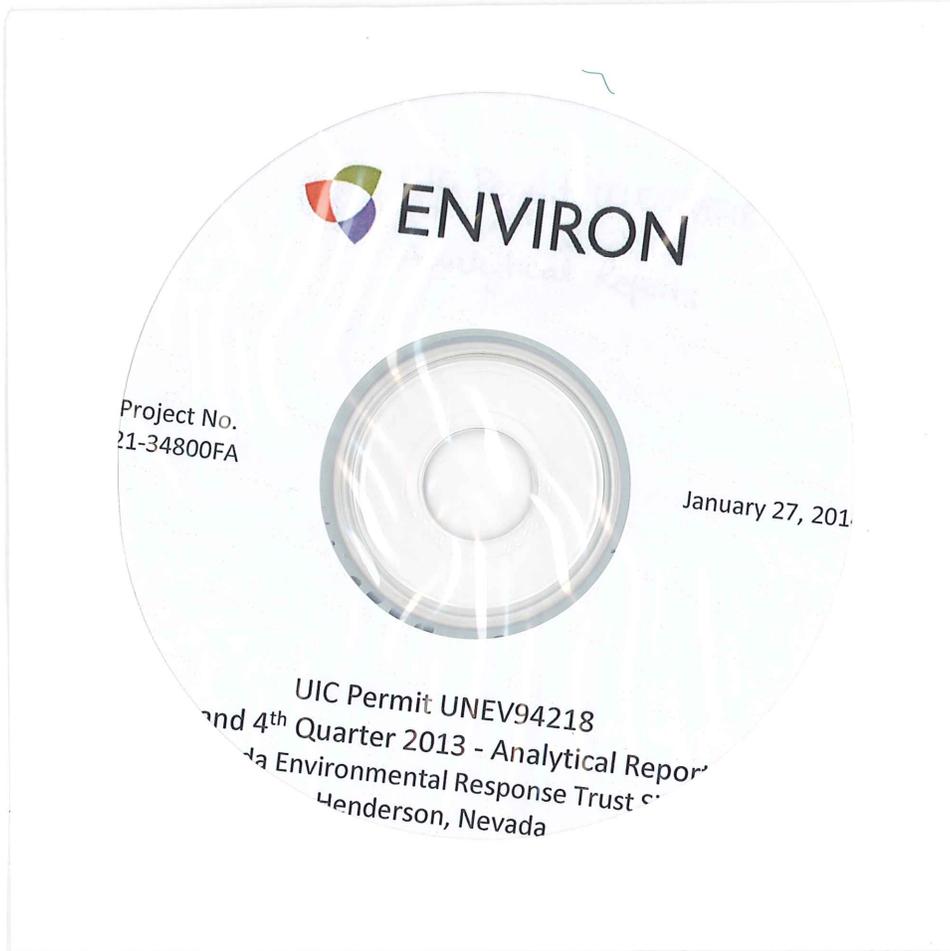

SAMPLING INFORMATION			
Date sample collected (mm/dd/yy) :	Q3 = 08/19/13 to 09/05/13; Q4 = 11/11/13 to 11/13/13	Time Sampled :	Daylight hours
Name of Sampler :	Envirogen Technologies, Inc.		
Location sample taken (be specific) "sample port in pipeline 10 feet from wellhead" :	Monitoring well head		
Type of Sample (circle one) :	<input checked="" type="radio"/> Grab <input type="radio"/> Composite other (specify):		
Collection method (circle one) :	well bailed <input checked="" type="radio"/> water pumped artesian flow air/gas lift		
Collection method/ non-well Describe how sample was taken:			
How much fluid (gallons or well volumes) was discharged / purged before collecting sample? :	~ three casing volumes		
Filtering Note: UIC requirements specify water samples shall not be filtered, unless previously approved. If filtration is approved, sample shall be filtered with a 1.0 micron filter, not 0.45 micron. If approved, document date of approval: _____			
Was the sample filtered? :	<input checked="" type="checkbox"/> YES <input checked="" type="checkbox"/> NO Perchlorate samples analyzed by EPA Method 314.0 are sterile filtered, per NDEP request; other samples not filtered		
Was conductivity measured during discharge to establish stabilized conditions?	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO		
Was decontamination procedures (reference O & M?) followed during sampling of multiple wells	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO NA		
FIELD MEASUREMENTS See attached table			
pH : S. Conductivity : Temperature :			
What UIC Sample List is <u>required</u> :	UIC List 1	UIC List 2	UIC List 3 Other**: <u>Cr, Cr +6, perchlorate, TDS</u>
** Other constituent listed must have prior UIC approval before using			
Were any holding times exceeded? pH, Cr +6	<input checked="" type="checkbox"/> YES <input type="checkbox"/> NO		
In Final sample documentation, ensure all results are reported with appropriate units. If measurements are below detection limits, indicate detection limit value. DO NOT REPORT VALUES AS NON-DETECT OR ND, INSTEAD REPORT as <(Detection Limit Value)>
