**Re: NDEP Draft Comments on Post-Remediation Screening Health Risk Assessment Report for Parcels C, D, F, G and H, Revision 3; Nevada Environmental Response Trust Site, Henderson, Nevada (#H-000539)**

Dear Mr. Dong,

At the direction of the Nevada Environmental Response Trust (Trust), ENVIRON reviewed the draft comments received from the Nevada Division of Environmental Protection (NDEP) on the *Post-Remediation Screening Health Risk Assessment Report for Parcels C, D, F, G and H, Revision 3* (HRArev3), dated June 19, 2014. The draft comments were transmitted from NDEP to the Trust in an e-mail dated February 5, 2015.

Following discussions with the Trust, Revision 3 of the HRA will be revised in response to the NDEP comments as outlined below:

Comment	Comments that will be addressed	Comments for which no further revisions are required [a]	Comments that will not be addressed (or only partially addressed) [b]
General comments	#1 #4 #3a-f #5a,b		#2
Comments on HRArev3 Attachment A-1	#3a #4a	#2a #5a	#1a,b
Comments on HRArev3 Attachment A-2	#1a,b #15a #3a,b #17a #4a #18a #5a #19a #9a #20a #10b #22a #14a	#6a #21a #7a #23a #8a #24a #11a	#2a,b #13a #10a #16a #12a

[a] NDEP indicated that the revisions made to HRArev3 are acceptable

[b] The Trust requests that NDEP exclude these comments from the formal transmittal of comments.

ENVIRON, on behalf of the Trust, requests that NDEP exclude those comments listed in the last column of the above table from the final comment transmittal. As previously discussed with NDEP, it is anticipated that significant effort will be needed to revise the HRAreV3 report to address these comments. At the same time, these requested revisions are not anticipated to change the overall conclusions of the HRA. This is particularly true for this HRA, in which the evaluation is based on the maximum detected concentrations across all parcels, providing a conservative estimate of potential risk and significantly reducing the need to provide some of the more detailed information or spatial analyses requested in the comments.

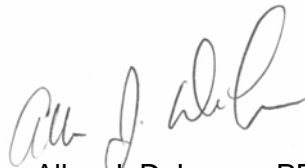

The report will be revised and submitted to NDEP for review within four months of receiving the final comments.

Please contact John Pekala at (602) 734-7710 or Allan DeLorme at (510) 420-2565 if you have any comments or questions concerning our approach.

Sincerely,

John M. Pekala, PG
