Notes:

Data in this table have been provided by others. Ramboll Environ and the Trust have not independently verified these data.

mg/L = milligrams per liter

µg/L = micrograms per liter

ft amsl = feet above mean sea level

OSSM = Olin Chlor-Alkali/Stauffer/Syngenta/Montrose

SNWA = Southern Nevada Water Authority

TIMET = Titanium Metals Corporation

NA = Not analyzed

NM = Not measured

-- = Result is available from the NERT site sampling and is presented in Tables A-1 or A-2

¹Endeavour's TDS results were converted from field specific conductivity measurements using a conversion factor of 0.707.

Qualifier Notes:

J = Concentration is estimated

J- = Estimated concentration, potential negative bias

J+ = Estimated concentration, potential positive bias

< = Concentration is less than indicated laboratory method reporting limit

UJ = Concentration is less than estimated laboratory method reporting limit

J-CAB = Estimated concentration due to cation-anion balance

J-TDS = Estimated concentration due to major ion TDS calculation
