RE: Treatability Study Modification No. 7  
Unit 4 Source Area In-Situ Bioremediation Bench-Scale Treatability Study  
Nevada Environmental Response Trust  
Henderson, Nevada

Dear Dr. Dong:

The Nevada Environmental Response Trust (NERT) is pleased to present the Treatability Study Modification No. 7 associated with the Unit 4 Source Area In-Situ Bioremediation Bench-Scale Treatability Study for Nevada Division of Environmental Protection (NDEP) review. As previously discussed, preliminary analysis by University of Nevada, Las Vegas indicates that molasses and emulsified vegetable oil are much more effective in biological treatment in the Unit 4 source area than citric acid. As such, NERT instructed Tetra Tech to prepare the attached modification to remove citric acid from the scope of the bench-scale work.

If you have any questions or concerns regarding this matter, feel to contact me at (702) 960-4309 or at [steve.clough@nert-trust.com](mailto:steve.clough@nert-trust.com).
