Subject: RE: NERT - Planned Shutdown of IWF, Chromium Treatment Plant, SWF, Lift Station 1, and IX Treatment Plant

Steve,

NDEP received and reviewed the Planned Shutdown of IWF, Chromium Treatment Plant, SWF, Lift Station 1, and IX Treatment Plant and finds it is acceptable. We discussed this planned shutdown during my monthly visiting on the October 10, 2022. It is our expectation and interest that the shutdown of SWF and the Lift Station 1 is minimized due to its location close to the Las Vegas Wash.

Thanks,
Weiquan

Subject: NERT - Planned Shutdown of IWF, Chromium Treatment Plant, SWF, Lift Station 1, and IX Treatment Plant

WARNING - This email originated from outside the State of Nevada. Exercise caution when opening attachments or clicking links, especially from unknown senders.

Weiquan,

In accordance with our NDEP-approved reporting procedures I wanted to notify you that Envirogen is planning to shutdown numerous systems to upgrade some electrical components of the GWETS as listed below.

1. The IWF will be shutdown for 8 hours to complete final connections associated with the replacement of the wiring to each individual extraction well.
2. Chromium Treatment Plant will be shutdown for 8 hours to establish new electrical connections for Chromium Treatment Subsystem.

3. Lift Station 1, the Seep Well Field, and IX Treatment Plant will be shutdown for 8 hours to facilitate preliminary electrical upgrades to the electrical systems at Lift Station 1.

All work will be performed on Wednesday, 11/16 and all work will occur simultaneously to minimize the shutdown of GWETS components. During this time the AWF and FBRs will continue to operate normally.

If you have any questions, feel free to contact me. Thanks.
