Subject: Case Narrative report 212263

Enclosed is MWH Laboratories Report 212263

Sample receipt: The samples arrived at MWH Laboratories, Monrovia, CA on August 3, 2007 with proper chain of custody. All containers were received without any visible signs of tampering or breakage at proper temperature. Samples are identified on the acknowledgement, which is part of the report package, along with the chain of custody.

Case Narrative:

For the MWH Laboratories data the following issues were observed:

Samples for hex chrome were received after the RCRA 24 hour holding time and are reported with an H3 flag.

PH for several samples was tested outside of the laboratory holding time, because the initial pH analysis had a bias on continuing calibration. Field pH is the most reliable determination of pH.

Sincerely,

Andrew Eaton, PhD
Project Manager
