

Comments Regarding Appendix D:

Well H-28A is owned by Stauffer and has no available well screen information in the January 2013 All Wells Database. The sample depth fields in the Electronic Data Deliverable (EDD) have been left blank for H-28A samples. ENVIRON has contacted the well owner to attempt to get this information. In future EDDs, the Trust will include sample depths for H-28A when that information becomes available.

Perchlorate results for 33 samples were reanalyzed for result confirmation and both results were reported by the laboratory. The least technically acceptable result for each pair was marked rejected in the data validation process. These rejected results are listed in Attachment B, Section IX of the Data Validation Summary Report (Appendix C). Both sets of results are included in this Electronic Data Deliverable. The rejected results have a final_validation_qualifier of "R".
