RE: In-Situ Chromium Treatability Study  
Nevada Environmental Response Trust  
Henderson, Nevada

Dear Dr. Dong:

The Nevada Environmental Response Trust (NERT) is pleased to present the Addendum to the In-Situ Chromium Treatability Study Results Report for Nevada Division of Environmental Protection (NDEP) review. As you will recall, NERT completed additional sampling following completion of the planned treatability study in order to monitor the further degradation of chromium and other key constituents such as nitrate, chlorate, perchlorate, and chloroform as suggested by the data collected during the last performance monitoring event of the In-Situ Chromium Treatability Study. The attached addendum summarizes the findings of the two additional performance monitoring events completed between March and June 2018. The results of this treatability study (and this addendum) will be ultimately incorporated into the Feasibility Study (FS) to be prepared by NERT following completion of the Remedial Investigation. The evaluation of the applicable remedial action alternatives completed in the FS will consider the findings of this treatability study, as well as any others conducted, to prepare NERT's recommendation for remedial action alternatives to address Henderson Legacy Conditions.

If you have any questions or concerns regarding this matter, feel to contact me at (702) 960-4309 or at [steve.clough@nert-trust.com](mailto:steve.clough@nert-trust.com).
