Study Monthly Progress Report

TASK PROGRESS UPDATE: JULY 2020

At the direction of the Nevada Environmental Response Trust (NERT or Trust), Ramboll US Corporation (Ramboll) has prepared this memorandum which summarizes Ramboll's progress during July 2020 toward successfully implementing the Las Vegas Wash Zero-Valent Iron (ZVI)-Enhanced Bioremediation Treatability Study, formerly known as the Galleria Drive ZVI-Enhanced Bioremediation Treatability Study. Treatability laboratory testing was performed by PRIMA Environmental via subcontract with Ramboll on behalf of NERT.

TASK M18 – LAS VEGAS WASH ZVI-ENHANCED BIOREMEDIATION TREATABILITY STUDY

- Task Leaders – Scott Warner / Chris Ritchie
- Current Status
 - As previously reported, a data gap evaluation was completed in April 2020 consistent with Treatability/Pilot Study Modification No. 9, which was submitted to the Nevada Division of Environmental Protection (NDEP) on October 8, 2019 and approved by NDEP on October 14, 2019. Phase 2 (design and implementation of a field test) is planned to be completed in the vicinity of Las Vegas Wash Transect 1A (Transect 1A) pending submission and approval of a Work Plan Addendum, which will include Transect 1A field investigation results, bench-scale testing findings, and the Phase 2 field test design. Results of the Transect 1A bench-scale testing, which was completed in April 2020, support field testing of coarse-grain granular ZVI in the Transect 1A area and are being used to inform the Phase 2 field test design.
 - A draft Work Plan Addendum and supporting Cost Basis document are currently under Trust and third-party review.
- Schedule and Progress Updates
 - A Work Plan Addendum and supporting Cost Basis document are anticipated to be submitted to NDEP in third quarter 2020.
- Health and Safety
 - No safety incidents occurred during July 2020.
