Subject: Data Package for MWH Laboratories Report 169215

Mr. Kennedy:

Enclosed is MWH Laboratories Report 169215 with the data, Subcontractor Report and the MWH Labs raw data package as requested.

Sample receipt: The soil samples arrived at MWH Laboratories, Monrovia, CA on March 8, 2006 for other subcontractor analysis after being picked up from EMAX Laboratories. EMAX retained the containers needed for analysis and these were reported separately under MWH Report 169338.

All containers were received without any visible signs of tampering or breakage. No analysis was performed by MWH Labs.

The samples were identified as follows:

MWH LAB#	CLIENT ID	SUBCONTRACTOR LAB
2603090024	M120-0.5	EMS, STL, GEL, FRONTIER
2603090026	M120-5	GEL
2603090027	M120-10	EMS, STL, GEL, FRONTIER
2603090028	M120-30	EMS, STL, GEL, FRONTIER
2603090029	M120-50	GEL

The subcontractor labs are as follows:

EMS: EMS, Pasadena, CA – Soil Asbestos Analysis
STL: Severn Trent Laboratories, West Sacramento, CA – Congener Analysis
GEL: General Engineering Laboratories, LLC, Charleston, SC – Radioactivity Analysis
FRONTIER: Frontier GeoSciences, Seattle, WA – Methyl mercury Analysis

Case Narrative: Please see the subcontractor reports for any technical or administrative problem during analysis, data review and reduction are contained in the analytical case narratives in the associated data package.

Data Package: The enclosed data package includes the Report, Chain of Custody, applicable Subcontractor Lab reports to document the billing and the MWH Raw data package.

Sincerely,

Linda Geddes
Project Manager

Subject RE: Henderson COC modifications

History: This message has been replied to.

Robert,

Item#3: We have only 2 sleeves for the analyses we need to do here. 2 out of 3 samples you listed need full list of analytes and with added MS/MSD on M120-30. We will need most of the samples. All the extra jars for other labs are in MWH custody and we have no extra jar left.

One question: Do you need MBAS and Conductivity for soil? I believe you need TDS and TSS for water only and they won't be logged in for soil.

Linda: If you haven't sent out the samples to other labs yesterday, Could you please get the samples for Asbestos from the jars that were picked-up yesterday? Thanks.

Subject: Henderson COC modifications

Ye,

I have talked to Brian about a few changes we want to make in the COC with the serial no. 5219 from the samples collected 3/7/06:

- 1) Please add perchlorate and hexavalent chromium to the analytes for MS/MSD analysis of sample M120-50 MS/MSD at line item 5.
- 2) Please add MS/MSD analyses to the organochlorine pesticides, PCBs, organophosphorous pesticides, and SVOCs for sample M120-30 at line item 1.
- 3) Please add bulk asbestos in soil analysis to sample M120-30 (line item 1 on COC 5219), sample M120-0.5 (line item 1 on COC 5218), and sample M120-10 (line item 3 on COC 5218). These samples should go to EMS Laboratory. Linda said someone from MWH will be by to make a pick-up today so call Linda to see if she needs extra sample jars from your lab. If Emax can

Linda Geddes printed this.

have them ready to go then MWH will take care of the shipping to EMS.

If you have any questions please call or email me.

Re: Methyl Mercury for Project # 169215

Dear Ms. Geddes,

Enclosed, please find our report concerning methyl mercury in three (3) soil samples received on March 17, 2006 for Project #169215.

High QA and a complete data package were added to the project on March 30, 2006 per our phone conversation.

There were no analytical issues encountered with this analysis and any QC issues are addressed in the following report.

Please feel free to call or e-mail if you have further questions or concerns.

Sincerely,

Kristina Spadafora
Project Manager

**MWH Laboratories
Methyl Mercury in Soil
Project # 169215**

April 19, 2006

Frontier Geosciences Inc.
414 Pontius Ave. North
Seattle, WA 98109

1. Scope of Work

Three (3) soil samples were submitted on March 16, 2006 for methyl mercury analysis using cold vapor gas chromatographic atomic fluorescence spectrometry (CV-GC-AFS, FGS-070).

2. Sample Receipt

The samples identified above were received at Frontier Geosciences in good condition on March 17, 2006 within a sealed cooler at a temperature of 2.7 °C. All samples were securely received and logged in according to Frontier's protocols on the day of receipt.

3. Analysis

Samples were processed using ultra-clean sample handling techniques in laminar flow clean areas known to be low in atmospheric trace metals. Reagents, gases, and deionized water are all reagent or ultra-pure grade, and were previously analyzed for trace metals to ensure very low blanks.

Daily analytical runs were begun with a 5-point standard curve, spanning the entire analytical range of interest, with additional standards run every 10 samples. The daily standard curves were calculated using a linear regression forced through zero of the blank-corrected initial standards. For each analytical set, one matrix duplicate, two matrix spikes, and three method blanks were co-processed and analyzed in exactly the same manner as ordinary samples.

Sample Extraction. Samples were processed with an extraction designed for a soil/sediment matrix (Frontier standard operating procedure FGS-045) on March 26, 2006. In summary, the methyl Hg in an aliquot of the sample is extracted from acidic bromide slurry into methylene chloride and then back into pure water.

Methyl Hg analysis. Extracted samples were analyzed for methyl Hg in accordance with the standard operating procedures (SOPs) described in the Frontier Geosciences Quality

Assurance manual. Acetate buffer and ethylating agent were added to an aliquot of sample and the methyl Hg purged onto carbotraps. The mercury species on the carbotrap column were volatilized and separated using a gas chromatography column, reduced on a pyrolytic column and detected by an atomic fluorescence detector. The extracted samples were analyzed on March 27, 2006.

4. Analytical Issues

There were no analytical issues and all QC samples were within control.

Please feel free to contact me with any questions or concerns regarding this report.

High QA Report:
Analyst: Citron Choice
Data Set : MHg7-060327-1
Reviewer : Shelly Fank
Reviewed Date: 4/10/06

1. Calibration was performed on at least five calibration standards.
2. The calibration curve used at least four standards and achieved a correlation coefficient of greater than 0.995.
3. The ICV meets acceptable criteria of 80-120%R.
4. The ICB meets acceptable criteria of less than or equal to 0.02 ng/g.
5. All CCVs have %R within 75-125% except:

CCV	Analyte	%R	Comments
None			

6. All LCS have %R within 75-125% except:

LCS ID	Analyte	%R	Comments
None			

7. All MD results pass the < 25% RPD Criteria.
Except:None

8. No prep issues noted.

TDS checked transcription.

Any other comments regarding instrument/data packages (internal standard trends/missing portions such as prep logs etc.):

All Sample Duplicates/Triplicates/ have RPD/RSD below 25%.
Except: None.

All sample MS and MSD have %R within 75-125% unless spike concentration is less than 1x the ambient concentration.
Except: None.

All analytical issues or other problems:
1. No other issues noted.

Follow-up items. (This would be items such as mass or dilution factors that have a problem or if a sample was changed on the Sample/Batch report but did not appear to be changed on the sample analysis report.)

These items should be emailed to the QA coordinator, lab manager, AL group leader, PM and PM group leader. They should respond as to how the item was addressed and what action was taken. That should then be amended to this report.

CASE NARRATIVE
for
MWH LABORATORIES
MWH PROJECT: 99-22088/169215
CDM/ASHTABULA SITE
SDG: 158048

April 12, 2006

Laboratory Identification:

General Engineering Laboratories, LLC
2040 Savage Road
Charleston, South Carolina 29407
(843) 556-8171

Summary

Sample receipt The samples arrived at General Engineering Laboratories, LLC, Charleston, South Carolina on March 10, 2006 for analysis. Shipping container temperatures were checked, documented, and within specifications. The samples were delivered with proper chain of custody documentation and signatures. All sample containers arrived without any visible signs of tampering or breakage.

Sample Identification The laboratory received the following samples:

<u>Laboratory ID</u>	<u>Client ID</u>
158048001	2603090024
158048002	2603090027
158048003	2603090028
158048004	2603090026
158048005	2603090029

Case Narrative

Sample analyses were conducted using methodology as outlined in General Engineering Laboratories (GEL) Standard Operating Procedures. Any technical or administrative problems during analysis, data review, and reduction are contained in the analytical case narratives in the enclosed data package.

Data Package

The enclosed data package contains the following sections: Case Narrative, Chain of Custody, Cooler Receipt Checklist, Data Package Qualifier Definitions and data from the following fractions: Radiochemistry.

This data package, to the best of my knowledge, is in compliance with technical and administrative requirements.

To: Linda Geddes <Linda.Geddes@us.mwhglobal.com>
CC: Edie Kent <emk@gel.com>, benjamin Jenkins <ben01079@gel.com>

Linda:
Additionally, the samplers did not sign the chain when they relinquished the samples.

Also, there is a note on the chain that an acknowledgment of receipt is requested to Michael Lettona's attention. Can you provide an e-mail address for him so that we can send that to him?

Will we be receiving samples tomorrow?

Edie

Edie Kent wrote:

Linda:
We received the soil samples today. The samples arrived at 17C which would not be an issue with the tests requested. We received 2 containers each for 2603090026 and 2603090029 and one container each for all other samples. The chain only indicates that extra volume is being sent for sample 2603090029.

RADIOLOGICAL ANALYSIS

**Radiochemistry Case Narrative
MWH Laboratories (MWHL)
Work Order 158048**

Method/Analysis Information

Product: Alphaspec Po210, solid
Analytical Method: DOE EML HASL-300, Po-01-RC Modified
Prep Method: Dry Soil Prep
Analytical Batch Number: 515989
Prep Batch Number: 511798

Sample ID	Client ID
158048001	2603090024
158048002	2603090027
158048003	2603090028
1201060425	Method Blank (MB)
1201060426	158048002(2603090027) Sample Duplicate (DUP)
1201060427	158048002(2603090027) Matrix Spike (MS)
1201060428	Laboratory Control Sample (LCS)
1201060429	Qualification Sample (KNOWN)

SOP Reference

Procedure for preparation, analysis and reporting of analytical data are controlled by General Engineering Laboratories, LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-RAD-A-016 REV# 8.

Calibration Information:

Calibration Information

All initial and continuing calibration requirements have been met.

Standards Information

Standard solution(s) for these analyses are NIST traceable and used before the expiration date(s).

Sample Geometry

All counting sources were prepared in the same geometry as the calibration standards.

Quality Control (QC) Information:

Blank Information

The blank volume is representative of the sample volume in this batch.

Designated QC

The following sample was used for QC: 158048002 (2603090027).

QC Information

All of the QC samples met the required acceptance limits.

Technical Information:

Holding Time

All sample procedures for this sample set were performed within the required holding time.

Preparation Information

All preparation criteria have been met for these analyses.

Sample Re-prep/Re-analysis

Batch was reprepared due to poor resolution. Sample 1201060428 (LCS) was recounted due to low/high recovery.

Miscellaneous Information:**NCR Documentation**

Nonconformance reports are generated to document any procedural anomalies that may deviate from referenced SOP or contractual documents. A nonconformance report (NCR) was not generated for this SDG.

Manual Integration

No manual integrations were performed on data in this batch.

Additional Comments

The sample and duplicate, 1201060426 (2603090027) and 158048002 (2603090027), do not meet the relative percent difference requirements for Po-210, however they do meet the relative error ratio requirements with a value of 0.515.

Qualifier information

Manual qualifiers were not required.

Preparation Information

All preparation criteria have been met for these analyses.

Sample Re-prep/Re-analysis

None of the samples in this sample set required reprep or reanalysis.

Chemical Recoveries

All chemical recoveries meet the required acceptance limits for this sample set.

Gross Alpha/Beta Preparation Information

High hygroscopic salt content in evaporated samples can cause the sample mass to fluctuate due to moisture absorption. To minimize this interference, the salts are converted to oxides by heating the sample under a flame until a dull red color is obtained. The conversion to oxides stabilizes the sample weight and ensures that proper alpha/beta efficiencies are assigned for each sample. Volatile radioisotopes of carbon, hydrogen, technetium, polonium and cesium may be lost during sample heating.

Miscellaneous Information:

NCR Documentation

Nonconformance reports are generated to document any procedural anomalies that may deviate from referenced SOP or contractual documents. A nonconformance report (NCR) was not generated for this SDG.

SOP Reference

Procedure for preparation, analysis and reporting of analytical data are controlled by General Engineering Laboratories, LLC as Standard Operating Procedure (SOP). The data discussed in this narrative has been analyzed in accordance with GL-RAD-A-023 REV# 11.

Calibration Information:

Calibration Information

All initial and continuing calibration requirements have been met. The calibration for Total Uranium is

performed prior to each analysis and is located in the raw data section.

Standards Information

Standard solution(s) for these analyses are NIST traceable and used before the expiration date(s).

Sample Geometry

All counting sources were prepared in the same geometry as the calibration standards.

Quality Control (QC) Information:**Blank Information**

The blank volume is representative of the sample volume in this batch.

Designated QC

The following sample was used for QC: 158048005 (2603090029).

QC Information

Refer to Non-Conformance Report.

Technical Information:**Holding Time**

All sample procedures for this sample set were performed within the required holding time.

Preparation Information

All preparation criteria have been met for these analyses.

Sample Re-prep/Re-analysis

The initial result of the following sample, 158048003 (2603090028), failed lifetime during initial analysis. Sample was reanalyzed and passed. Second result is reported. The initial results for samples 158048001 (2603090024) and 158048004 (2603090026) failed lifetime. Samples were diluted 1:10 and reanalyzed. The diluted samples were reanalyzed a second time to verify the initial diluted results. The initial diluted results are reported. The initial results for samples 158048002 (2603090027) and 158048005 (2603090029) were greater than CRDL. Samples were reanalyzed and passed. The batch was reprepared due to a failed laboratory control sample recovery and a failed relative percent difference.

Miscellaneous Information:**NCR Documentation**

Nonconformance reports are generated to document any procedural anomalies that may deviate from referenced SOP or contractual documents. The following NCR was generated for this SDG: NCR 306774 was generated due to Failed Recovery for MS/PS. 1. The matrix spike, 1201063865, did not meet the recovery requirement due to matrix interference. The batch was previously prepped with similar results. 1. Reporting results.

Qualifier information

Manual qualifiers were not required.

Certification Statement

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless otherwise noted in the analytical case narrative.

Review Validation:

GEL requires all analytical data to be verified by a qualified data validator. In addition, all data designated for CLP or CLP-like packaging will receive a third level validation upon completion of the data package.

The following data validator verified the information presented in this case narrative:

SAMPLE DATA SUMMARY

GENERAL ENGINEERING LABORATORIES, LLC

2040 Savage Road Charleston SC 29407 - (843) 556-8171 - www.gel.com

Certificate of Analysis Report for

MWHL002 MWH Laboratories (PO 99-22088)

Client SDG: 158048 GEL Work Order: 158048

The Qualifiers in this report are defined as follows:

- * Indicates that a quality control analyte recovery is outside of specified acceptance criteria.
- < Result is less than amount reported.
- > Result is greater than amount reported.
- B Target analyte was detected in the sample as well as the associated blank.
- BD Results below the MDC or low tracer recovery.
- D Sample has been diluted and reanalyzed after initially exceeding inst. calibration range
- E Concentration of the target analyte exceeds the instrument calibration range.
- H Analytical holding time exceeded.
- J Indicates an estimated value.
- P The response between the confirmation and the primary columns is >40% Different.
- R Sample results are rejected.
- U Target analyte was analyzed for but not detected above the MDL or LOD.
- UI Uncertain identification for gamma spectroscopy.
- X Lab-specific qualifier-please see case narrative, data summary package or contact your project manager for details.
- Y QC Samples were not spiked with this compound.
- Z Paint Filter qualifier: Particulates passed through the filter. No free liquids were observed.
- d The 2:1 depletion requirement was not met for this sample
- h Sample preparation or preservation holding time exceeded.
- ND The analyte concentration is not detected above the reporting limit.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the Certificate of Analysis.

** Indicates the analyte is a surrogate compound.

This data report has been prepared and reviewed in accordance with General Engineering Laboratories, LLC standard operating procedures. Please direct any questions to your Project Manager, Edith Kent.

Notes:

The Qualifiers in this report are defined as follows:

- B Target analyte was detected in the sample as well as the associated blank.
- BD Results below the MDC or low tracer recovery.
- E Concentration of the target analyte exceeds the instrument calibration range.
- H Analytical holding time exceeded.
- J Indicates an estimated value.
- U Target analyte was analyzed for but not detected above the MDL or LOD.
- UI Uncertain identification for gamma spectroscopy.
- X Lab-specific qualifier-please see case narrative, data summary package or contact your project manager for details.
- d The 2:1 depletion requirement was not met for this sample
- h Sample preparation or preservation holding time exceeded.

Page 5 of 5

Parmname	NOM	Sample	Qual	QC	Units	RPD%	REC%	Range	Anlst	Date	Time
----------	-----	--------	------	----	-------	------	------	-------	-------	------	------

N/A indicates that spike recovery limits do not apply when sample concentration exceeds spike conc. by a factor of 4 or more.

^ The Relative Percent Difference (RPD) obtained from the sample duplicate (DUP) is evaluated against the acceptance criteria when the sample is greater than five times (5X) the contract required detection limit (RL). In cases where either the sample or duplicate value is less than 5X the RL, a control limit of +/- the RL is used to evaluate the DUP result.

For PS, PSD, and SDILT results, the values listed are the measured amounts, not final concentrations.

Where the analytical method has been performed under NELAP certification, the analysis has met all of the requirements of the NELAC standard unless qualified on the QC Summary.

REFERENCE: Project No.: 169215
Sub PO#99-22089

REPORT NO: 106002

SAMPLES SUBMITTED IN PACKAGE: Soils

Three samples were submitted for PLM analysis

The samples were identified as follows:

2603090024
2603090027
2063090028

The sample identifications and assigned EMS Laboratories, Numbers are found in the Narrative which follows.

Respectfully submitted,

EMS LABORATORIES, INC.

A.J. Kolk
Technical Director

AJK/ah

NOTE: The results of the analysis are based upon the samples submitted to the laboratory. No representation is made regarding the sampling area other than that implied by the analytical results for the immediate vicinity of the samples analyzed as calculated from the data presented with those samples.

This report, from a NIST laboratory through NVLAP, must not be used by the client to claim product endorsement by NVLAP or any agency of the U.S. Government.

This report shall not be reproduced, except in full, without the written approval of EMS Laboratories, Inc.

Any deviation or exclusion from the test method is noted in this cover letter.

Unless otherwise noted in this cover letter, the samples were received properly packaged, clearly identified and intact.

NARRATIVE

REFERENCE: Project No.: 169215
Sub PO#99-22089

REPORT NO: 106002

Three samples were received on March 10, 2006 at 12:00pm for asbestos analysis by PLM. The samples were collected on March 7, 2006. The samples were identified as:

<u>Sample No.</u>	<u>EMS Lab No.</u>
2603090024	106002-4
2603090027	106002-7
2603090028	106002-8

No problems were encounter during sample receipt.

The soil samples were prepared according to CARB 435 and analyzed according to EPA 600/R-93/116.

The samples were dried at 60°C for four hours. The dried soil was crushed and milled until the final material was 200 mesh or less.

The soil was first examined at low magnification in a stereo microscope for suspected asbestos fiber bundles or mats.

The samples were then analyzed by PLM with dispersion staining for asbestos fibers. If none were found in the first preparation, two more preparations were made.

Instruments used were Zeiss a microscopes, Serial Nos. 122310 and 102702. The microscopes were serviced on May 13, 2005 by an optical microscope specialist firm.

The calibration of the refractive index liquid (used for dispersion staining) is enclosed.

I certify that this data package is in compliance with the terms and conditions of the contract, both technically and for completeness, for other than the conditions detailed above. In addition, I certify that to the best of my knowledge and belief, the data as reported are true and accurate. Release of the data contained in this data package has been authorized by A.J. Kolk, Jr., Technical Director, as verified by the following signature.

A.J. Kolk, Jr.
Technical Director

EMS REPORT: 106002

DATE IN: 3/10/6

PRIORITY: STD

CLIENT: MWH Laboratories
750 Royal Oaks Drive, Ste 100
Monrovia, CA 91016

ATTENTION:

CUSTOMER REFERENCE NO.: 169215

NO. OF SAMPLES: 3 DEPT: PLM

SUBJECT: ACM

DATE TO ANALYST: 3/10/06 ANALYST: 2

ANALYTIC METHODS: plm (435)

DATE ANALYZED: 3/15/06

QA ANALYST: SP QA DATE: 3/15/06

DATE FAXED: 3-16-06 VERBAL RESULTS: _____

DATE MAILED: 3-22-06

INVOICE INSTRUCTIONS:

NIST Bulk Asbestos Proficiency Test
August 2005, Round M22005

NVLAP Lab Code 101218-0

PROFICIENCY TEST M22005 SUBTOTALS

Sample 1	0
Sample 2	0
Sample 3	0
Sample 4	0

TOTAL POINTS 0

Failure = 150 or more total points

NIST Bulk Asbestos Proficiency Test
August 2005, Round M22005

NVLAP Lab Code 101218-0

SAMPLE 1

Criteria	Reported by Laboratory	Reference Values	Acceptable Answers	Assigned Points
Asbestos Type (150 pts./type)	CHRY	Chrysotile	Chrysotile	0
Reporting Additional Asbestos Type (150 pts. if >0.1%, 75 pts. if 0.1%)	NONE	None	None	0
% Asbestos (50 pts.)	1.9	3%	1% to 10%	0
Color (10 pts.)	CL	CL (clear)	CL (clear)	0
Pleochroism (10 pts.)	N	N (no)	N (no)	0
Extinction (10 pts.)	P	P (parallel)	P (parallel)	0
Sign of Elongation (10 pts.)	P	P (positive)	P (positive)	0
Average Refractive Index (40 pts. each index, 10 pts. if $\gamma=\alpha$ or γ & α reversed)	1.554 1.549	$\gamma=1.557$ $\alpha=1.549$	$\gamma=1.550$ to 1.564 $\alpha=1.542$ to 1.556	0
Birefringence (10 pts.)	L	L (low)	L (low)	0

Total Points Assigned for Sample 1 = 0

NVLAP Lab Code 101218-0

SAMPLE 2

Criteria	Reported by Laboratory	Reference Values	Acceptable Answers	Assigned Points
Asbestos Type (150 pts./type)	CHRY	Chrysotile	Chrysotile	0
Reporting Additional Asbestos Type (150 pts. if >0.1%, 75 pts. if 0.1%)	NONE	None	None	0
% Asbestos (50 pts.)	14.1	7%	1% to 30%	0
Color (10 pts.)	CL	CL (clear)	CL (clear)	0
Pleochroism (10 pts.)	N	N (no)	N (no)	0
Extinction (10 pts.)	P	P (parallel)	P (parallel)	0
Sign of Elongation (10 pts.)	P	P (positive)	P (positive)	0
Average Refractive Index (40 pts. each index, 10 pts. if $\gamma=\alpha$ or γ & α reversed)	1.553 1.551	$\gamma=1.558$ $\alpha=1.551$	$\gamma=1.551$ to 1.565 $\alpha=1.544$ to 1.558	0
Birefringence (10 pts.)	L	L (low)	L (low)	0

Total Points Assigned for Sample 2 = 0

NIST Bulk Asbestos Proficiency Test
August 2005, Round M22005

NVLAP Lab Code 101218-0

SAMPLE 3

Criteria	Reported by Laboratory	Reference Values	Acceptable Answers	Assigned Points
Asbestos Type (150 pts./type)	NONE	None	None	0

Total Points Assigned for Sample 3 = 0

NVLAP Lab Code 101218-0

SAMPLE 4

Criteria	Reported by Laboratory	Reference Values	Acceptable Answers	Assigned Points
Asbestos Type (150 pts./type)	TREM	Tremolite	Actinolite or Tremolite	0
Reporting Additional Asbestos Type (150 pts. if >0.1%, 75 pts. if 0.1%)	NONE	None	None	0
% Asbestos (50 pts.)	1.3	0.5%	0.1% to 4%	0
Color (10 pts.)	CL	CL (clear)	CL (clear)	0
Pleochroism (10 pts.)	N	N (no)	N (no)	0
Extinction (10 pts.)	I	I (inclined)	I (inclined)	0
Sign of Elongation (10 pts.)	P	P (positive)	P (positive)	0
Average Refractive Index (40 pts. each index, 10 pts. if $\gamma=\alpha$ or γ & α reversed)	1.630 1.606	$\gamma=1.633$ $\alpha=1.603$	$\gamma=1.618$ to 1.648 $\alpha=1.588$ to 1.618	
Birefringence (10 pts.)	M	M (medium)	M (medium)	0

Total Points Assigned for Sample 4 = 0
